Victory V Patent Assures Fortune For Keen Thinker

TULSA, Okla. Nov. 29—(AP)—Pratho P. Scott didn't think up the V-for-victory emblem, but he had a better idea. He got a patent on it, and now he stands to make a fortune from its commercial use.

The V has been widely employed, as in jewelry and clothing designs, but strangely enough nobody ever took the trouble to safeguard it with a patent.

That clever little brain child was reserved for Scotty and now it seems that all the commercial organizations utilizing the patriotic symbol of a battle-torn Britain may have to pay royalties to him.

Scott, genial, hustling sales manager for a Tulsa boat company, got his bright idea recently when he designed a V-for-victory boat pennant for a customer. Inside the V appeared the well-known three dots and a dash, Morse code for V.

The customer rejected the drawing but it got Scotty to thinking. He employed a patent attorney, advanced the necessary $150 patent fees, and sat back to see what would hppen.

Plenty happened, and so quickly it made Scotty's head swim. A search of the patent office files in Washington disclosed that the Tulsan had a good hunch. There was no patent on the V and one was issued to him.

The number of the patent, 130-317, may be as lucky for him as the winning combination on a sweepstakes ticket.

For no sooner had it been granted than a dozen firms offered to negotiate with him for exclusive rights.
