SLEEK WAR MACHINES WOULD GIVE BATTLEFIELD SOME CLASS

Steamlined war machines, harder to hit and less wind resistant, are the sketch-children of George W. Walker, industrial and automobile designer in Detroit. This troop carrier of his would carry three big guns, several swivel-type anti-aircraft weapons.

"Oh, All Right—Gee Whiz"

—A superior court jury was so impressed with diagrams for a Zeppelin which William Lee Canaday, 44, designed while in jail that it declared him sane and ordered him to stand trial for murder.

Canady is accused of shooting Hugh E. Holland, 62, his section boss, last December 4, and then burning the body.

Canady told the jury it would have been silly for him to shoot Holland when he already had the man under his special "death curse," one of several supernatural powers he claimed to possess.

Besides blueprinting a Zeppelin, Canady whiled away his time in jail by diagramming the mental processes which enable him to have visions. This is his "theory of filtered darkness."

Three alienists—Dr. Joseph Catton, San Francisco; Dr. F. W. Marnell, Stockton, and Dr. Albert Newton—said Canady was a paranoiac prior to December 4, but after the death of Holland his persecution complex apparently vanished.

Canady, himself, testified that he was sane, a statement which led his two defense attorneys to withdraw from the case.

Superior Judge Frank M. Allen said the murder trial would be delayed while he appoints new counsel for the defense.
