Pensions for World War No. 1 Veterans Opposed

WASHINGTON, May 28—(AP)—The senate finance committee today approved a bill to increase to \$40 a month the existing compensation of \$30 paid veterans of the first world war with non-service connected permanent and total disabilities.

It rejected, however, a proposed \$40 pension for all veterans of that conflict on becoming 65 years of age.

The committee acted on a measure passed by the house almost a year ago, which provided for both the increased compensation and the age pension.

Another measure passed by the house last June and providing pensions for widows, children and dependent parents of world war veterans was considered briefly by the senate group but action was deferred indefinitely.

Ickes Insists on Steel To Build Oil Pipe Line

WASHINGTON, May 28—(AP)—Petroleum Coordinator Ickes has asked the war production board again for priorities on steel to build the world's largest pipeline from Texas to New York, as a means of relieving the petroleum emergency in the east.

Ickes reiterated that so far as gasoline conservation was concerned, there was "no need, nor is it advisable" to make gasoline rationing nationwide, but added that this might be necessary to save rubber.

WPB Chief Donald Nelson said recently that the country could have this pipeline if it wanted to sacrifice production of ships and tanks. Priorities for the project have been rejected twice, by the old supply priorities allocation board and the WPB.

From where I sit... by Joe Marsh

HAVE you ever thought how much a million dollars really is? Sure is an awful lot of nice things a fellow could do with a million dollars... if he had it. A million dollars is a lot of money.

Just think... it would take about three weeks, counting as fast as you could 24 hours a day, just to count up to a million.

I read in the paper the other day that the beer industry pays more than a million dollars a day in taxes... Federal, State and local. Every day... more than a million dollars.

I guess the government is glad to get that help these days, what with a war to win and pay for.

Of course, not all of that beer tax money goes to the Federal government. Quite a lot of it goes to the States and is used for such useful purposes as public health, emergency relief, old age assistance, education and public welfare.

Farmers surely ought to like the beer industry, too, from what I

hear. Last year the brewers bought nearly two billion pounds of barley malt and nearly half a billion pounds of corn and corn products. And plenty of rice and hops, too. That's a lot of farm products.

Back around '33 and '34, when the tough old depression was hitting all of us pretty hard, farmers were certainly glad to sell those extra crops that beer bought from them. And come to think of it, when beer came back it made lots of new jobs for plenty of other people, too. City folks and country folks both.

If I hadn't gone in for this writing business, I think I'd like to have tried my hand at the brewing business.

I'd like to be making a fine tasting beverage that helps the public treasuries so much and that people can rightly call the "beverage of moderation." That moderation incidentally is another of the fine things about beer.

COTERIE CLUB HAS INTERESTING MEETING

GLENDALE, May 28.—The Coterie club met Wednesday afternoon at the home of Mrs. W. B. Garrett with Mrs. W. T. Harbour assisting hostess.

The library board was asked to decide on the disposition of the books in the library. It was decided to give the remaining funds to the Red Cross.

After discussion of present conditions a vote carried for the club to declare a recess for the duration of the war at least. It was voted that the present officers serve until the meeting in June which will be held at the home of Mrs. Ella Leach.
