Prune Quits Joke Category to Gain High Food Rating

Expert Gives Advice on How To Prepare for Eating; Old Style Soaking Discarded

By NANCY MORRIS
(Food Editor, The Oregonian)
Once the lowly prune was the object of many a boarding house joke, but now it is recognized as a valuable food. It has color and flavor as well as a delightful sweetness when its natural sugar has not been wasted in the pro-cess of cooking.

If homemakers have had any

idea that prunes are only suitable for use when nothing else seemed available, they have been missing available, they have been missing up many a good dish and passing up a fine opportunity to bring vari-ety to the cooking without en-croaching on the limited sugar

supply.

Dried prunes are a real food

Soaking Out of Style.

Now we realize this is wrong and soak the fruit only if the prunes are very dry or have very tough skins. The better flavored fruit is obtained by simmering prunes in only enough water to cover them and only until they there. frult is obtained by simmering accomprunes in only enough water to cover them and only until they are tender, which is generally

are tender, which is generally about 45 minutes.

This gives a firmer product and one with more individuality and also with a much better flavor.

If additional sweetening is desir-

ed, a little honey or sugar may be added about five minutes be-fore prunes are done. For those who prefer a slight-ly changed flavor for prunes, add a few paper-thin slices of lemon, two or three whole closes a stick two or three whole cloves, a stick

of cinnamon, or a thin slice of orange rind during the last 15 minutes of cooking.

Cooking prunes not soaked must be done slowly. If they must be soaked, be sure to use the water in which they have soaked in which to cook them. soaked in which to cook them. Otherwise much of the value of the fruit is lost,
