Relax and Stay Sane

A LOT of recreation experts and professional fun instigators are considering in convention the general prospects for and being pretty darned serious about it, too.

From the president down, one after another, they have repeated something that is pretty clear to anybody who thinks about it for a moment: namely, if all work and no play makes Jack a dull boy in ordinary times, all work and no play in times like these are likely to bring the man in the white coat knocking on the door. Dr. McCracken, president of Vassar college, put it with greater dignity when he told the National Recreation congress that without the spirit of play the world will

That is pretty obviously true, and it requires no experts to tell the average man that a judicious mixture of work and play is the right way to live.

There has to be a certain amount of spontaneity about play, however, for it to have full

When 70,000 howling baseball fans watch the classic clash of Yanks and Dodgers, the first thing to note is that they are hav. Guard Banc. ing a whale of a good time. The second thing to note is that nobody told them they had to go to the game; nobody was fining them if they didn't appear, or checking up on whether they went or not. Nobody was telling them when to cheer, or what was cheerable. They were all at the because that was where they wanted to be; hence they were relaxed, and for a couple of hours the world was well forgotten. And that is as it should be,

That is the American way to 10:02-Sign off, have fun and to get the kind of relaxation that really does some good. In the dictator countries they recognize the need for relaxation, too, so there are camps and resorts, and games. But they can't possibly be any fun with that insignificant looking fellow with the mustache gazing down from every wall; after 11 hours at the factory it can't be very helpful to have some brawny Storm Trooper come along, tap you on the shoulder, and say 'Come on, now! It's time to have fun! Heil Hitler!"

What is fun, anyway? Why, a little time to do what you want 10:45-Your Date With Don Nor to do without interference; to lose yourself in what you would 11:00-Australian News. doing all the time if you could, whether it is yelling for a homer, trolling for bass, or re mounting a stamp collection. Give opportunity and the peo ple will find their own fun.

(Continued from page 1.)

that Reltel, the German army chief, and Cavallero, the Italian army chief, are in Africa conferring with Rommel and that Wa vell is said to have come from In dla for a conference on the British situation.

THIS week's dispatches suggest the reason why both sides re-garded Africa as secondary in importance.

There seems little doubt that the big German push in Russia is definitely on. A London military "informant, not quotable by name," says the Germans have thrown more than a million men into the Kursk offensive in great "wheeling" operation. Their Immediate objective is cutting the Moscow-Rostov rail line, which supplies Timoshenko's armies.

They claim to have forced a crossing of the Don, which lies

just to the west of this rail line and is the last great river barrier until the Volga itself. They are expected to try to swing around outhward to Rostov, the gateway to the Caucasus, while another German drive is loosed across the Kerch straits at Rostov.

The London military informant who can't be quoted by name says the success of this campaign will determine whether the Germans are to get to the Caucasus

GUESSING again:

The Germans were putting everything they had into preparations for this great drive, and so couldn't spare much to Rommel. The British were putting everything they had into preparations to help the Russians meet it, and so couldn't spare their best to Egypt.

Hence Africa's status as a secondary front-a status that was upset by Rommel.

(ALL this, bear in mind, is whole-cloth guesswork, and must be regarded as such. It has \$5,00 2,50 1,25 no standing as a statement of fact.)

> AFRICA and Russia have absorbed practically all war interest.

But note that U. S. submarines have entered the mysterious operations in the Aleutians, sinking three Jap destroyers and setting fire to another on July 4, U. S. army bombers are taking a hand whenever the fog permits.

U. S. General Kuter, back in Washington after a first-hand view, says U. S. airmen are DE-VISING SPECIAL MEANS to put the Japs within range FIGHTER PLANES from U. S. Alcution bases-probably extra gas tanks, long urged by aviation experts as a means of extending the range of fighters.
