**Oppose Freight Rate Changes, Stockmen Urged**

PORTLAND, July 1—(AP)—President Fred A. Phillips of the Northwestern Livestock Shippers' Traffic league urges western stockmen to oppose any change in freight rates on meat and livestock for the duration.

After announcement of his election yesterday, the Baker county man said stockmen should take their protests against rate revisions to the Interstate Commerce commission.

**Pig Production in Oregon to Set Record**

PORTLAND, July 1—(AP)—Oregon is producing a record number of pigs this year—304,000, the Department of Agriculture estimated today.

The spring litter saved is about 60 per cent higher than last year and 45 per cent above the 10-year average. Production is up in every section of the state, but the biggest gain is east of the Cascades, where yields of grain feed were high last year.

**Restrictions in Use of National Forests Listed**

Beginning July 1, the three fire restrictions, the camp fire permit restriction, the no smoking while travelling regulation and the axe, shovel and bucket requirement become effective, according to V. V. Harpham, supervisor of the Umpqua National forest. Campers going into a national forest for recreation will need to secure a camp fire permit from a ranger or guard station if they wish to build a camp fire any place other than at improved forest camps.

The no-smoking while traveling restriction applies only to travelers on narrow forest roads and while hiking along trails or moving around in the woods and does not apply to automobile travelers on two-way surfaced highways.

The North Umpqua road as far as Copeland creek is considered a two-way surfaced road and is exempt from this restriction. However, from Copeland creek on to Diamond lake and other narrow forest roads on the Umpqua come within the restriction. Campers using improved forest camps need not have an axe, shovel and bucket with them. However, it is always good practice to be thus equipped, according to the supervisor, so that should a fire be discovered, the necessary equipment is available for putting it out, and then, too, every careful camper should be prepared to extinguish his own fire.

Hiking parties are not required to carry such equipment with them but if a trip is made by pack saddle horse, then the axe, shovel and bucket are required. Another common sense rule every woodsman follows, Mr. Harpham continued, and one which is also a law, is to never leave your camp fire even for a short time without completely extinguishing it. If this rule is religiously followed by everyone camping in the forests, a very material reduction would be made in the number of forest fires each year caused by unextinguished and carelessly left camp fires.

Purchasers of clothing in Britain have been cut down by \$2,400,000,000 in two years of rationing.

**Liquor Ration System in Oregon Ruled O. K.**

SALEM, Ore., June 30—(AP)—The Oregon liquor control commission's rationing system, inaugurated to conserve the dwindling liquor supply, was upheld today in an opinion by Attorney General Van Winkle. The opinion was requested by Ernest M. Jachetta, commission attorney. The opinion, however, denied the commission authority to ration liquor which is ordered by and shipped to an individual in care of the commission's warehouse. These orders by individuals are placed directly with wholesalers.

State health departments spend nearly 54 million dollars a year throughout the United States.
