SPEAKING FOR YOUR STANDARD SERVICE MEN AND WOMEN

What to do with your gum!

Here's a word of advice to motorists who go bucketing merrily along thinking their oil filter is straining out the gum and goo that collects in all motor oil. 'Tain't so! After about 8,000 miles your filter ordinarily gets so clogged up that oil can't pass. It sidesteps through a by-pass valve and carries dust, gum and metal particles from the crankcase into your motor. That's an open invitation to repair bills—so ask us to replace your oil filter element every 8,000 miles. It only takes a minute.

Three Great Gasolines

I do a lot of talking about Standard "Unsurpassed," but that sure doesn't mean you should forget Standard's two other grades of gasoline. No sir, for a fellow who wants the power, pick-up and anti-knock performance of a premium gasoline, he can't get better than Standard's Supreme. And for economy value, just stick to Flight.

When your stop goes

Seeing if your stop light has gone out is just about as easy as looking at the back of your neck. To make sure you're getting this mighty important protection, ask any of us at the Sign of the Chevron to check it for you. If the bulb is out, we can install a new one in a flash.
