"A" Gasoline Coupons No 6 Expire July 21

...time for your MIDSUMMER OIL CHANGE, too

Do as thousands of car owners do... get fresh Golden Shell motor oil whenever you start a fresh page in your "A" Book (regardless of how few coupons you've had to use). It's the SAFEST plan for wartime engine care

MOST OF US are driving shorter distances at a slower pace these days. But that doesn't mean it's safe to forget oil changes.

The truth is, less driving means you should be even more careful, for oil is constantly exposed to dust and abrasives carried through the air—and to dilution by partially burned fuel particles.

Too, in short-trip driving at slower speeds, the engine often doesn't get hot enough to vaporize water formed by combustion and condensation. And when this water accumulates in your crankcase, it further contaminates your oil.

So, for the duration, instead of scheduling oil changes by mileage, let your "A" gasoline ration coupon book guide you. Each time you start a fresh page in the book (every two months) get fresh, safe Golden Shell motor oil.

Chances are you won't have to add a drop between times.

FREE HOME CANNING FOLDER

HOME CANNING and DRYING

Your nearest Shell Station has the new "How-To-Do-It" folder for home canning and drying of foods, a step-by-step guide to successful preserving of fruits and vegetables. The methods and directions are approved by Home Demonstration Office of the Agricultural Extension Department, University of California. Get your copy before the supply is exhausted.

WARM WEATHER MONTHS CALL FOR SHELLUBRICATION SERVICE

While you're having your motor oil changed, order the full Shelllubrication protection service. It includes:

1. COMPLETE LUBRICATION of all moving parts with fresh Shell Lubricants, safety inspection of the transmission and differential lubricant levels.
2. BATTERY CHECK—Especially important as reduced driving may allow battery strength to fall below normal.
3. COOLING SYSTEM CHECK—Inspection of fan belt, hose connections, oil filter mileage and condition.
4. SPARK PLUG CHECK—To see if cleaning and adjusting are necessary—because dirty plugs can waste 10% of your gasoline.
5. TIRE CHECK—for nails, glass, cuts, etc. Air pressure correction, tires dressed. All supplementing regular inspections required by Government.
6. CLEANING all windows and interior of car, polishing chrome, inspection of all the lights.
