THE WEST COAST MUST BE PROTECTED

The ground alert system (work performed by AWS) releases thousands of vitally needed planes and pilots who would otherwise have to be on air patrol for service on our fighting fronts. Civilian volunteers, who can do the work with minimum of army supervision and at hours convenient to them, release thousands more army personnel.

Those army men and women are needed elsewhere—their presence there will save lives, shorten the war. **Each woman knows no sacri-**

fice here at home is too great if it will bring back one son or husband who otherwise might rest beneath a nameless cross on foreign soil. Is a few hours a week a sacrifice? Especially when you can knit, write letters, mend, read, etc., while on duty?

Don't make a few conscientious, farsighted neighbors undertake the entire burden. The more volunteers, the less each must give. The Pacific coast must be guarded and civilians can do a large part of it—let's all do our share; this is our war, too.
