High Production Of Needed Crops Urged in Goals

Continued high production of important food crops with emphasis on those yielding high amounts of food in proportion to land and labor expended, is called for in 1944 production goals announced this week by the Oregon USDA War board.

Established

Established at a three-day meeting of state farm leaders and agricultural agency repre-sentatives, the goals are intended to be the best contribution that Oregon can make, with capacity use of its agricultural resources, to the nation's 1944 war crop needs. Just as the final decisions on state goals were made by Ore-gon people, so will each Oregon farmer be asked to decide on the best contribution his farm make toward meeting the goals.

Increased acreage is sought for some crops, and as only so much land is available, proportionate decreases are asked for others. In the "more wanted" group are wheat, 800,000 acres, up 6 per cent; dry edible peas, 75,000 acres, up 75 per cent; sugar beets, 12,000 acres, up 20 per cent; corn, 60,000 acres, up 18 per cent.

Other Goals Listed

Substantial increases are want Substantial increases are wanted in legume and cover crop seeds of which Oregon is a leading producer. Goals include vetches, 175,000 acres, up 30 per cent; ryegrass, 108,000 acres, up 41 per cent; alfalfa seed 8000 acres, up 100 per cent; red clover seed, 18,000 acres, up 180 per cent; alsiko 000 acres, up 180 per cent; alske clover seed, 17,000 no change. De-creases are asked for Austrian peas, down 43 per cent to 37,000 acres, and crimson clover, down 43 per cent to 2000 acres.

Other crop goals: Potatoes, 50, 000 acres, down 6 per cent; dry beans, 3000 acres, down 25 per cent; oats, 440,000 acres, up 1 per cent; barley, 260,000 acres, down 23 per cent; rye 25,000 acres, no change; flaxseed, 3000 acres change; flaxseed, 3000 acres down 40 per cent; tame hay, 915, 000 acres, up 5 per cent; fiber

Five per cent more fresh vege tables are asked, up to 21,200 acres, Goals for major processing vegetables are green peas, 48,00 vegetables it a clarge; tomatoes, 1900 list, acres, down 9 per cent; sweet corn, 5000 acres, no change, and green beans, 4400 acres, no change, and change.

Deward E. Waggoner, assistant for the corn, 5000 acres, no change, and green beans, 4400 acres, no change, and state registrar of vital statistics, disclosed that 1,629 babies were born to Smiths in Oregon between 1931 and 1940. The between 1931 and 1940. The

Some Mines Closed as War Needs Are Filled

WASHINGTON, Oct. 28—(AP)
—Asserting that production of many vital metals has outstripped war needs, the War Production board has ordered the closure of numerous mines producing low-grade ores, banned additional imports of some metals, and with

drew premium prices paid to cer-tain marginal mine operators. Underscoring the manpower shortage, WPB said the use of critical manpower can not now be justified in marginal mines inasmuch as stocks of metals once woefully short now are adequate.

Mines in virtually every miner al producing area will be affected by today's order, which, however, exempts iron and copper ore production. Hardest hit are the "war baby" mines producing bauxite, (aluminum), lead, vana dium, tungsten, chrome, graphite, molybdenum and cobalt.

Prep School Students To Get Month's Vacation

WASHINGTON, Oct. 28—(AP)

Many college and prep school students will get a month's vaca tion in the Christmas-New Year holiday season if educational institutions follow requests made by the Office of Defense Transportation.

The ODT asked that holiday vacations start not later than De-cember 15, and terminate not before January 11, 1944, to elimi-nate expected crushes on railrods and bus lines. If schools can not comply with the extended va-cation request, the ODT urged that vacations stort and end in mid-week, to eliminate week-end
