G. W. Churchill Named Ranger of Diamond Lake Area

Appointment of George W. Churchill as ranger for the Diamond lake district of the Umpqua National forest was announced here today by V. V. Harpham, forest supervisor. Headquarters for the district are maintained at Roseburg for approximately six months of each year, and at the Big Camas ranger station during the balance of the year, usually from May 1 to November 1.

Mr. Churchill succeeds District Ranger Leroy Garwood, who is being retired on account of ill health. Mr. Garwood, who has served the Diamond lake district, will continue to make his home in Roseburg.

Churchill first became interested in work with the forest service in 1924, when he was employed as a telephone operator at Big Camas. He worked seasonally for the forest service while attending high school and the Oregon State college school of forestry, from which he was graduated in 1934. He was employed for one season with a grazing resource survey party in Utah. He served as a technical foreman on the Umpqua forest in the CCC organization prior to 1940, when he was transferred to the Deschutes National forest with headquarters at Bend, where

he was employed primarily as a timber sales officer, working on the Shevlin-Hixon and Brooks-Scanlon sales. In April, 1942, he was transferred to the Hines sale on the Malheur National forest, the largest Ponderosa pine sale ever consummated by the forest service.

In August, 1942, he was transferred to the Rogue river forest, with headquarters at Union creek, where he was engaged in district ranger work until last November at which time he was transferred to similar work on the Siuslaw forest, with headquarters at Waldport.

His duties as district ranger for the Diamond lake district start today.

Mr. and Mrs. Churchill have purchased a home on South Pine street in Roseburg. He is a son of the late Frank H. Churchill, founder of the Churchill Hardware company. His mother resides at 118 S. Kane street, Roseburg.

TODAY'S NO. 1 WAR SHORTAGE IS WASTE PAPER!

Paper tops the list of war materials which are critically short... yet there's paper everywhere.

Stacks of old newspapers and magazines in basements... tons of dusty old files in business store-rooms... thousands of old boxes and cartons in warehouses.

What is that paper doing there when it is so desperately needed at the front? Needed for shell containers, bomb rings, instrument boards, plane wing-tips. Needed to make or wrap over 700,000 articles used by our fighting

men today on every battlefield!

With full-scale invasion, use of these products will rise to new heights. To meet this challenge, we must find two million extra tons of waste paper this year.

Go into action today... bring that boy home sooner. Organize your neighborhood... your friends, clubs, business and church groups. Enlist the boys and girls as waste paper commandos.

Have you been saying you'd like to do more? Well, here's something you can do. So do it now!

Newspapers: Fold them flat (the way the paper boy sells them) and file them in bundles about 12 inches high.

Magazines and Books: Tie them in bundles about 18 inches high.

Corrugated and Card-board Boxes and Cartons: Flatten them out and tie them in bundles about 12 inches high.

Wastebasket Paper (Wrappers, Envelopes, Etc.): Flatten and pack down in a box or bundle, so that it can be carried.
