ROSE SCHOOL GIRLS ORGANIZE CAMP FIRE GROUP RECENTLY

The Rose school girls have recently organized a Camp Fire group with Fritzie Hamilton as guardian. The group has been named Maricopa. The original tribe of Maricopa Indians lived in the southwest and their deeds are recorded in the general history of North America. They were a very accomplished band and their beautiful blankets are as famous as the Navajos. Officers elected for the year

included: Charlene Deets, president; Valerie Sparks, vice-president; Marilyn Beard, treasurer; Nadine Sparks, secretary; Rose Emily Bond, scribe, and Brenda Baird, sergeant-at-arms. Following the meeting the members enjoyed a social hour of games.

Proposed Support Prices For Crops Near 1943 Levels

Proposed 1944 food production support prices announced by War Food Administrator Marvin Jones follow closely along 1943 levels, with slight increases for a few crops, according to information released by Leo Sparks, chairman of the Douglas County AAA committee. The program is subject to approval by congress.

Support prices on barley are 10 cents higher than 1943 levels. As previously announced, hog prices are slated for a drop of \$1 a hundred pounds on October 1. Loans on corn and wheat will again be at 85 per cent of parity. Prices for butter, cheddar cheese, skim milk, eggs and chickens likewise will be unchanged.

As in 1943, the program calls for support of the 34 commodities listed through loans to growers, purchasers, and contracts with approved processors and buyers.

Yet to be announced are support programs for prunes, vegetables for processing and certain fruits for processing. The list of announced support prices includes these principal commodities:

Wheat—Continued loans at 85

per cent of parity. Barley—Loans at 90 cents a bushel, 10 cents increase. Dry peas (Smooth type)—Continue support at \$5.65 per cwt.

Vol. VI Published Weekly by the Douglas County Flour Mills, Feb. 7, 1944
No. 6 Mfgs. of Umpqua and Sunrise Poultry and Dairy Feeds. 1944

NOTICE TO ALL POULTRYMEN AND STOCK FEEDERS

We are copying below Food Production Order No. 9 covering the limitations on sale, shipment, and inventories of protein meal and on use of soybean products.

We believe that the general public and especially those who will be using protein feeds during the coming year in the production of eggs, turkey, milk, etc., should be fully acquainted with the agreement that each and every feed manufacturer, distributor, or consumer must sign and abide by in order to secure their necessary allotments of feed. Please bear in mind that this is no guarantee that anyone will receive as much protein as necessary, but is simply a food production order limiting the use of ingredients IF you can get them.

LIMITATIONS ON SALE, SHIPMENT, AND INVENTORIES OF PROTEIN MEAL AND ON USE OF SOYBEAN PRODUCTS

Food Production Order No. 9, Revision No. 3 Section 1220.2 is hereby revised and amended in its entirety to read as follows:

(a) Limitation on sale, shipment, and inventories of protein meal and on use of soybean products—(a) Set-aside requirement. Any processor shall, when so ordered by the Director of Food Production, War Food Administration hereinafter referred to as the "Director", set aside, for sale and delivery to such agency or other person or into such area as the Director may designate, such quantity of protein meal as the Director may specify.

(b) Restrictions on shipments into designated areas. The Director may, from time to time, prohibit or limit the shipment or delivery of any kind of protein meal into any area that he may designate. No person shall make or accept any shipment or delivery of protein meal in violation of any order issued by the Director pursuant to the authority granted by this paragraph.

(c) Limitation on delivery of protein meal by handlers. Whenever he deems it necessary to obtain an equitable distribution of protein meal in any area, the Director may limit the quantity of protein meal which any class of handlers within such area may deliver to feeders during any part of the feeding year.

(d) Limitations on mixed feed manufacturers. During the 1944 calendar year, no mixed feed manufacturer shall use any quantity of protein meal in the manufacture of mixed feeds, which is in excess of the average quantity of protein meal used by him in the manufacture of mixed feeds during the calendar years 1942 and 1943, and in determining the average quantity of protein meal used by a mixed feed manufacturer in 1942 and 1943, the quantity to be considered as used in December, 1943 shall be the average of the quantities used by him in October and November, 1943. Whenever he deems it necessary to obtain such distribution of protein meal as will be equitable among mixed feed manufacturers, handlers and feeders, the Director may limit the quantity of protein meal which any mixed feed manufacturer may use in the manufacture of mixed feeds during any part of the feeding year.

(e) Limitations on protein processors. Whenever he deems it necessary to obtain such distribution of protein meal as will be equitable among persons who purchase protein meal from

processors, the Director may limit the quantity of protein meal which any processor may deliver to any class of buyers during any part of the feeding year.

(f) Prohibition on sale, purchase and use of soybean products, other than soybean meal, cake or pellets for feed. No person shall sell or deliver and no person shall purchase or accept delivery of soy flour, grits or similar edible products of soybeans, other than soybean meal cake or pellets, for use as or manufacture into feed for livestock and poultry, and no such products shall be used as or manufactured into feed for livestock and poultry.

(g) Inventory limitations. (1) No person shall accept delivery of any protein meal, which together with his inventory or protein meal, would exceed the total tonnage of protein meal needed by such person to fill his manufacturing, sales or feeding requirements, as follows:

(i) Season's requirements for fish meal;

(ii) Sixty days' requirements for tankage and meat scraps; and

(iii) Thirty days' requirements for all other protein meal;

(a) Any handler or mixed feed manufacturer may accept delivery of a single carload lot (as determined under regulation of the Office of Defense Transportation) of any protein meal if individual deliveries of carload lots are not made more frequently than similar deliveries to such person in the past;

(b) Any feeder may accept delivery at any one time of not to exceed 2,000 pounds of any protein meal if individual deliveries are not made more frequently than similar deliveries to such person in the past; and

(c) Any ranchman may accept delivery of protein meal in such amounts as are necessary to provide a readily available supply of protein meal for ranch feeding purposes and to make the most economical use of transportation facilities under regulations issued by the Office of Defense Transportation.

(2) The Director may prohibit any processor from building up an inventory of protein meal in excess of either the quantity produced by him during the last fifteen days in which he produced protein meal or his inventory meal in the corresponding day of the feeding year 1941-42, whichever is greater.

The undersigned declares to his vendor and to the War Food Administration that he is familiar with the provisions of Food Production Order No. 9, Revision No. 3, and that this purchase, acquisition, or acceptance of protein meal from such vendor is in compliance with the provisions of such order.

(m) Penalties for violations. Any person who willfully violates any provision of this order or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States, or who conspires with another person to perform any of such acts, is guilty of a crime and upon conviction may be punished by fine and imprisonment. In addition, any such person, by administrative suspension order, may be prohibited from receiving any deliveries of, or selling or otherwise disposing of, or using, protein meal or any other material now or hereafter authorized to be rationed or allocated by, or subject to the priority control of, the War Food Administrator, and may be deprived of any priority assistance. Further, the Director may recommend to the Office of Price Administration or to the War Production Board that any person who violates any provision of this order or any amendment or supplement thereto be denied the right to receive, use, sell, or otherwise dispose of any other materials which now are or in the future may be under allocation.

Glen always puts a wisecrack in the feed bag to sort of sweeten it up. This one was clipped out of a San Francisco paper.

Frederick C. Hart, head of the seed and rice section of the OPA's Agricultural Division, addressed a group of Northern California seed growers at the Palace. Before proceeding to outline the advances the industry was making under the OPA program, he told them this story.

A former seed grower himself, he was drafted to work for the OPA's seed and rice section some time ago. After a week of the chaos and confusion of the OPA's Washington office, Mr. Hart went to his boss one day. "I want you to move my desk down the hall into the men's washroom," he said. "Why?" asked his astonished boss. "Because," replied Hart, "that is the only place in Washington where anyone seems to know what he's doing."
