Distribution of Goods Going On More Even Basis

WASHINGTON, Feb. 17—(AP)—The War Production Board soon will issue a directive designed to bring about more equitable distribution of retailers of essential but scarce consumer goods such as children's underwear and outerwear garments, bed sheets, and numerous other commodities. Authoritative sources, reporting the directive is in the works, described it today as "one of the most important steps forward" in stabilizing a somewhat turbulent situation in essential civilian supplies.

WPB has had field men confer with manufacturers and wholesalers and says it has their cooperation "nearly down."

However, in case cooperation pledges work loose, those who have seen drafts of the directive say it contains provisions for clamping down on the wayward.

Two paramount factors of present distribution difficulties are large shifts in population and the fact that some retailers have become market "orphans"—meaning the manufacturers who formerly supplied them have switched completely to war contracts. WPB's answer is that manufacturers and wholesalers will sell amounts of their good to retailers on a percentage basis of population changes in the given shopping area.
