A COSTLY CHECKING JOB

By Charles V. Stanton

PETER EDSON, political observer at Washington, D. C., points out a sorry state of affairs. Because he presents facts which we believe every citizen should ponder carefully, we quote from his report as follows:

If you are looking for a quick guide on what's wrong with this country and particularly this government, all you have to do is gander the list of special investigations being conducted by congressional committees.

Total cost of these congressional probings for the war years has been over \$3,000,000, according to tabulations by the senate financial clerk and the house committee on accounts.

Get that again. It is costing three million bucks just to try to find out what's wrong?

Investigating costs for the current 78th sessions is approximately \$2,000,000; for the 77th it was \$1,000,000. Of the 63 special investigations now being conducted, 25 are by standing committees of the senate, 16 by standing committees of the house, 12 by senate special committees, 10 by special house committees.

And here, comrades, is a partial list and the cost:

Agriculture—Four senate investigations: commodity prices in District of Columbia, \$1000; production, distribution and consumption of foods, \$5000; Rural Electrification Administration, \$7500; synthetic alcohol and rubber, \$11,500. Three house investigations: Farm Security Administration, \$20,000; farm products, \$50,000; guayule rubber, \$5000.

Civil Service—Senate: operation of civil service laws, \$2500. House: civilian employment in government, \$34,500.

Communications—Senate: international wire and radio, \$5000. House: investigation of Federal Communications Commission, \$110,000.

District of Columbia—Senate: the water system, \$5000. Housing—House: defense housing program, \$10,000.

Indian Affairs Investigations—Senate, \$109,000. House, \$15,000.

Military Affairs—Senate: war contracts, \$5000; mobilization of technological resources, \$12,500. House: \$155,000.

National Defense—Senate: Truman committee, \$400,000. House: Merchant marine investigation, \$77,000.

Music—Senate: Petrillo ban on recordings, \$5000. Naval Affairs—Senate: Inspection of naval establishments, \$4000. House, \$140,000.

Silver—Senate: Effects of Silver Purchase Act, \$10,000. Small Business—Senate: \$115,000. House: \$67,500.

Un-American Activities—House: Dies committee, \$477,500; subversive activities of government employees, \$15,000.

United Nations Relief and Rehabilitation Administration—House: \$500.

Wool—Senate: production, transportation and marketing, \$23,000.

Whoopee!—Senate: for entertainment of distinguished visitors, \$1000. House: Joint Committee to attend the Parliamentary Association of Canada, \$1000.

Services Honor War Dead From Canyonville Area

CANYONVILLE — An impressive and unusual service was conducted in the Canyonville Gospel tabernacle Sunday evening by Mrs. Jennie O'Brien, nationally known evangelist.

A prelude of patriotic music over the loud speaker system and a short concert by the orchestra was followed by a stirring song service.

Two long rows of candles in front of the church altar were bordered by two high candlestick groups at each end. Mrs. Adele Shaffer lit the candles for each son from the academy and Canyonville community—six in all—who have made the supreme sacrifice.

Each member of the audience was then privileged to come forward and light one candle for some member of the armed forces now serving his country, and as the entire group stood in reverent silence Rev. A. M. Shaffer offered a prayer of dedication and faith.

Evangelist O'Brien then followed the ceremony with a stirring address. This service concluded a week's series of meetings by Mrs. O'Brien at the tabernacle. Her stay was followed up by the world-traveled missionary lecturer and Bible teacher, Rev. H. Brooks of Springfield, Mo., who addressed the C. B. A. student body at each morning chapel service. His son, Tasker Brooks and wife presented a lovely concert of harp and instrumental music Wednesday evening. They were en route to California, where the Rev. Mr. Brooks will conduct his next series of meetings.

Members of Troop 34, Boy Scouts, were given an inspection trip through the Young's Bay Lumber company mill Saturday afternoon. The tour was conducted by John Todd, president of the Todd Building company, who handled construction details of the new plant. The inspection was authorized by Charles E. Miller, president of the lumber company.

Harrison R. Winston, son of Mr. and Mrs. H. A. Winston, Roseburg, has been commissioned as a second lieutenant in the army air forces and was awarded his pilot's wings at the advanced two-engine pilot school at Marfa, Texas, recently. A former student of Roseburg high school, Willamette university and University of Oregon, Winston was engaged in the practice of law prior to entering military service.

Lenroot Resigns Federal Judgeship

WASHINGTON, April 22 (AP)—Irvine L. Lenroot, former Wisconsin progressive republican senator, who narrowly missed being president of the United States back in the 1920's, resigned at the age of 75 today as judge of the U. S. court of customs and patent appeals, a post he had held here for 15 years.

Lenroot served nearly 20 years in congress, 1909-29, the last decade in the senate where he led the fight for American adherence to the world court but opposed the league of nations without the Lodge reservations. He was chairman of the lands committee when the Teapot Dome scandal broke.

As a senator, Lenroot was the favorite of leaders in the G. O. P. convention of 1920 as a running mate for Warren G. Harding. But the delegates swung into line behind Calvin Coolidge after his gubernatorial achievements in Massachusetts had been acclaimed by an Oregon delegate and the big California delegation gave him its vote. Coolidge won, was elected and succeeded to the presidency with the death of Harding in 1923.

The operation of the War Production board in handling an application of this type is quite complex. It must go through a great many steps before final action.

The application for construction of this plant was filed by the Willamette Wood Chemicals company on February 10th. It then underwent some technical revisions following a conference of chemists and engineers. When presented to the chemical division of the War Production board it was promptly and enthusiastically approved March 21st. That was the first step and a very important one. The news that the project had cleared the Chemicals bureau was considered by some people equivalent to final granting. Hence, the printed statements that the plant was approved.

Since the Chemical bureau's approval, however, the application has been under consideration by the Facilities committee and by the requirements committee of WPB. The latter group, early this week, declined to approve the application, giving rise to the printed statement that the application had been totally and completely denied.

The project is still very much alive, and is now subject to review and consideration by the War Production board itself. The facts of the case are so compelling that I believe the WPB will approve the project. When you realize that alcohol is now being purchased by the government at a price averaging three times what it would cost to produce it from sawdust (30 cents from grain, sugar, petroleum, and molasses), and that the present sources of alcohol are either very expensive or in a state of critical shortage, I cannot believe the War Production board will shut its eyes to these facts and decline to provide a source of alcohol from waste material at a low price.

The most compelling and startling fact about alcohol production is that more than one-half of the total requirement is being made from grain. Our grain reserves are exhausted, and for the past two years, we have been consuming grain at a rate of 400,000,000 bushels annually in excess of our annual production plus imports. A drastic shortage of feed is certain next year. But regardless of this fact, alcohol production from grain still requires 160,000,000 bushels annually. The War Production board knows these facts, and I do not believe they will be willing to ignore them.

Hon. John McCormack (D-Mass.) told me yesterday that two of the late Senator McNary's forestry bills will be acted upon in the house during the coming week. One of these bills is an authorization for cooperative forest fire protection money. The other one is to provide for a continuation of the forest survey. These bills are non-controversial and unopposed.

Washington News From an Inside View

Argument, Sentiment, Comment

By HARRIS ELLSWORTH, Congressman, Fourth Oregon District

WASHINGTON, April 15—The proposal to produce alcohol from wood waste has lately attracted an unusual amount of national interest. As is generally known in my district, the first such plant in America will be installed at Springfield, Oregon, if and when the War Production board gives its approval.

A number of the statements made in national magazines and some newspaper stories I have seen have contained several errors regarding this project. Some stories say the plant has been approved. Some even go to the extent of saying that construction is under way. This week, the press wires carried a story based on an action taken by the requirements committee of the War Production board, stating that the project has been killed. Neither of those statements is correct, although in each case the writers had some excuse for making the errors.

The operation of the War Production board in handling an application of this type is quite complex. It must go through a great many steps before final action.

The application for construction of this plant was filed by the Willamette Wood Chemicals company on February 10th. It then underwent some technical revisions following a conference of chemists and engineers. When presented to the chemical division of the War Production board it was promptly and enthusiastically approved March 21st. That was the first step and a very important one. The news that the project had cleared the Chemicals bureau was considered by some people equivalent to final granting. Hence, the printed statements that the plant was approved.

Since the Chemical bureau's approval, however, the application has been under consideration by the Facilities committee and by the requirements committee of WPB. The latter group, early this week, declined to approve the application, giving rise to the printed statement that the application had been totally and completely denied.

The project is still very much alive, and is now subject to review and consideration by the War Production board itself. The facts of the case are so compelling that I believe the WPB will approve the project. When you realize that alcohol is now being purchased by the government at a price averaging three times what it would cost to produce it from sawdust (30 cents from grain, sugar, petroleum, and molasses), and that the present sources of alcohol are either very expensive or in a state of critical shortage, I cannot believe the War Production board will shut its eyes to these facts and decline to provide a source of alcohol from waste material at a low price.

The most compelling and startling fact about alcohol production is that more than one-half of the total requirement is being made from grain. Our grain reserves are exhausted, and for the past two years, we have been consuming grain at a rate of 400,000,000 bushels annually in excess of our annual production plus imports. A drastic shortage of feed is certain next year. But regardless of this fact, alcohol production from grain still requires 160,000,000 bushels annually. The War Production board knows these facts, and I do not believe they will be willing to ignore them.

Hon. John McCormack (D-Mass.) told me yesterday that two of the late Senator McNary's forestry bills will be acted upon in the house during the coming week. One of these bills is an authorization for cooperative forest fire protection money. The other one is to provide for a continuation of the forest survey. These bills are non-controversial and unopposed.

SHERIDAN, Wyo. (AP)—Charles Brammer is blind but he operates power tools with perfect accuracy and accuracy. Among the tools in his workshop are a lathe and an eight inch power saw, either of which might clip off a finger or an arm of a careless operator.

PORTLAND, April 18—(AP)—Mabel O. Grubbe, Klamath Falls, has filed a \$50,000 damage suit in federal district court against the California-Oregon Power company, charging it with negligence in the death of her husband, Charles H. Grubbe, from electric shock and burns on May 6, 1942.

EUGENE, Ore., April 18—(AP)—Rewards for capture of the person who cut out a dog's tongue here recently totaled more than \$2,000 today and Lane County Humane society officials began wondering what to do with the money if the culprit is not caught. Police report no clues.

There was a wreck at the Riddle intersection with highway 99 Friday afternoon when a lone traveler overturned his car. A truck load of soldiers came along and righted things for him, picked him up and hooked on to his car and took him along with them.

Mrs. Mayme Rust has sold her farm, bought the Chamberlain garage on East Broadway, and is having it remodeled into a house and has already moved in.

Mrs. George Trask, who recently underwent a serious operation at Sacred Heart hospital in Eugene, has been home over a week and is able to be up and about and is rapidly gaining strength.

North and south Myrtle creek ranchers all got a small snowstorm Wednesday.

Mrs. Vic Wynter and small daughter, April, are visiting at the home of Mrs. Ruth Wynter. They will return to their home in Portland Friday.

Stanley Whitney, who is stationed at Grand Island, Nebraska, arrived Sunday for a week's furlough which he is spending with his parents, Mr. and Mrs. A. A. Whitney. Stanley is doing carpenter work in the army.

Mr. and Mrs. J. W. Adamson returned home Tuesday from a week's visit at The Dalles with their daughter, Grace, and their son-in-law, Irving Elie, and their two little daughters, Karen Kay, and Onnetta Lou. While there they attended the Christian church and listened to the sermons by one of their former pastors, Harry Baird.

Dr. J. C. Maxson and wife have sold their small farm one mile south of town on the highway, to Mr. and Mrs. Henry Small and have purchased what is known as the Hurst barns located on Cedar street.

The O. E. S. held their social and regular meeting at the home of Mrs. Yola Near Tuesday afternoon.

WASHINGTON, April 22—(AP)—The U. S. circuit court of appeals refused today to interfere with the trial of 30 persons accused of participating in a Nazi conspiracy against American democracy.

The proceedings had been attacked in the appellate court on behalf of Edward James Smythe of New York, the defendant whose absence delayed the trial two days until he was arrested. James J. Laughlin, his attorney, had asked for a writ of mandamus to hold up the trial until the higher court could determine if it were proceeding according to law.

At the same time the appellate court turned down a petition on behalf of Joseph McWilliams, another defendant, to disqualify Justice Edward Eicher, presiding, on the grounds of prejudice, and refused a rehearing asked on behalf of James True, on a similar petition which already had been turned down.

When the trial is resumed Monday the business before the court will be selection of a jury from a venire reduced by the decision of Justice Eicher to disqualify veniremen who heard a prosecutor refer to previous indictments against some of the defendants.

WASHINGTON, April 22—(AP)—Irvine L. Lenroot, former Wisconsin progressive republican senator, who narrowly missed being president of the United States back in the 1920's, resigned at the age of 75 today as judge of the U.
