## the FEED BAG

Vol. VI Published Weekly by the Douglas County Flour Mill, May 1  
No. 16 Mfrs. of Umpqua and Sunrise Poultry and Dairy Feeds. 1944

## FEED HIGHLIGHTS

Walter Berger, chief of the feed and livestock section of the War Food Administration, gave some interesting highlights on the livestock and poultry situation on his visit to the coast last week.

Mr. Berger pointed out that feeding of poultry and livestock has been going on at the rate of a "crop and a half a year." This has reduced the "surplus" to the vanishing point.

He says "goals" were purposely set high the last three years, on the theory that farmers would not reach the set goals. Instead, farmers exceeded goals consistently, bringing a bout what is now termed a surplus of poultry and meat animals. The public is eating meat at the rate of 14 lbs. per capita, compared to prewar 12 to 12 1/2 lbs. (Wonder where they get the red stamps.)

Protein feeds will be sufficient if properly distributed. But, supplies of feed will be slim from July to new crop; so strict conservation plus liquidation of stock may be necessary.

## HERE COMES THE BAND

During the past few weeks we have been running 25 minute programs of band music each week over KRNR. We like band music, and so do our friends. Judging from the many comments we have had, so starting this Wednesday at 8 p. m. "Here Comes the Band" will be heard just once each week, but for a full hour instead of fifteen minutes.

We hope you like it and that a little peppy band music will make your life just a little more pleasant. If you have a pet selection you would like to hear over this program, let us know, and we will try to get it played for you.

## IT'S UP TO YOU

If you have your feed delivered, PLEASE READ THIS COLUMN. For it is up to each and every one of you to help, or else there may not be any trucks to deliver with. Please bear in mind that new trucks are OUT. If one of our present pieces of equipment goes haywire someone won't get his feed at the henhouse door.

Rubber is scarce and costs like everything. If a truck backs over a broken bottle or an old plow share and cuts a tire in two, we pay the bill and try to get it fixed, or a new tire, and somebody doesn't get their feed.

Labor is scarce and getting scarcer. If the driver has to stop and clean the feed room before he can unload, or look over a bunch of sacks you want to send in, if the sacks are thrown in a pile like a junk heap; he wastes his time, and somebody doesn't get his feed.

If your road is so bad you can hardly plow through it with your own car, and along comes the feed truck with from six to ten tons of feed and gets stuck, grinds off a lot of rubber, busts an axle or rips out a gear, we pay the bill. And while we wait for parts, someone doesn't get his feed.

Even if your place isn't to blame, if our truck is broken down, it can't get to YOUR clean poultry house, over YOUR good road, even if you are considerate enough to help the driver unload and pack in the feed. (After all, the truck driver is human, and fully appreciates a little consideration.)

This may all sound funny to you. But it is OUR repair bill, and OUR lost time for some of the above mentioned items. During the last 30 days our repair bill has exceeded \$50,000.

We are doing our best to help you get the most out of your flocks. We appreciate your

## A NICE LETTER

Newspaper editors estimate that for every kick in the pants they receive in the mail, over two hundred readers have been made pretty sore. And that for every "bouquet" about five times that many customers were made happy. In other words, only one out of five letters praises, while the other four cuss the editor.

Imagine then, our feeling of smug satisfaction when we received the following letter last week: "Thought you might possibly care to use parts of the enclosed note, which came with our last hatching egg check. It is a very good ad for Umpqua feeds, especially Umpqua Breeder's Mash."

And here is the note: "We are paying 5c per doz. over the regular price for your eggs. \* \* \*. Some hatcheries have cut chick prices, but our reputation for chicks is such that we can command a better price. To produce the QUALITY OF EGGS YOU ARE SUPPLYING US costs more money than just the ordinary run of hatching eggs. If we can maintain our present chick price, will be only too glad to continue this egg price."

## PLAY SAFE

A drunk got on a two-decker bus and sat down by the driver. He talked and talked, until the driver suggested that he go up on the top deck. The drunk amiably went up, but was soon back.

The driver looked hopeless. "What's the matter? Didn't you like the view up there?"

"Sure, nice view, nice air. But it ain't safe up there. There ain't no driver."

Trade; but won't you please check up around the ranch and see if you can't help on your end? Thank you.
