PIN-WORMS Now can be Beaten!

The misery of Pin-Worms has been known for centuries, and many doctors have sought a way to deal with this dreadful pest that lives and grows inside the human body. For thanks to an important scientific discovery, a new and highly effective treatment is being hailed by medical authorities. It is based on a remarkable drug known as piperazine. This drug is the vital element in P-W, the new Pin-Worm tablet developed by the laboratories of Dr. D. J. Jayne & Son, America's leading specialists in worm medicines. P-W makes it unnecessary for you or your child to suffer in silence with the embarrassing itching, itch caused by Pin-Worms, or to take chances on the real distress they often create. The small, easy-to-swallow P-W tablets act in a special way to destroy Pin-Worms. So watch for possible warning signs such as itching seat and nose, uneasy stomach, bed-wetting, nervous fidgeting. If you suspect Pin-Worms, ask your druggist for a box of P-W and follow the simple directions carefully. It is easy to remember: P-W for Pin-Worms!
