Farm WAR NEWS

Wheat Rate Boosted
WFA has boosted the loan rate on 1944 wheat 7 cents per bushel to a national average of \$1.35 a bushel on the farm, which represents 90 per cent parity instead of the 85 per cent level of the last three years. The loan rate in Douglas county is 1.46. With the government loans available through the County AAA office, there is no reason why farmers need to dispose of their wheat at less than parity at this time.

Yardstick For Family Farm
The Department of Agriculture offers 3 tests for judging whether a property should be considered a "family farm": (1) Large enough to produce efficiently; (2) small enough so that the family does the work without hiring much outside help; (3) able to furnish a decent level of living for the family.

Legume, Grass Seed Vital
Increased harvesting of legume and grass seeds is extremely important this season because a greater need for these seeds has developed than can be met. Congress has provided an additional financial incentive to farmers to push the harvest of these seeds just as high as possible in the form of a \$12,500,000 appropriation earmarked for acreage and poundage payments under the agricultural conservation program for harvesting legume and grass seeds. The AAA practice has been broadened to provide payment of \$3.50 per acre for the entire acreage harvested by a farmer instead of the 25-acre limit originally specified in this practice. Special payments per pound will be made on alfalfa, red clover, and alsike clover under the AAA practice in addition to the acreage payment.

Farm Wage Ceilings
Farm wage ceilings must be requested by producers in accordance with a provision in the 1944-45 USDA appropriations act, which includes \$400,000 for administration of farm wage and salary stabilization program administered by WFA's office of labor and State WFA wage boards. The act provides that a specific wage ceiling regulation can be issued only if a majority of producers in an area affected by the action favor it. Accordingly the administrator has instructed wage boards to hold hearings whenever they are requested in writing by a majority of producers affected. The outcome of such hearings would determine the action to be taken by the administrator. On July 4, WFA placed the first ceiling on wages of dairy workers by announcing maximum rates of pay in parts of the Los Angeles metropolitan area—\$205 a month per string of cows on the base pay of regular milkers and \$195 a month for milk-house machine operators and milk-house can men. Certain additional payments such as bonuses are also covered by ceilings.

More Chain for Farmers
In a move to make farm chains (garners, wagon, cow ties, log and halter chains, repair and lap links) more generally available to farmers, WPB has authorized manufacturers to fill orders from suppliers without regard to most preference ratings. Production must be kept within permitted schedules based on 1940 and 1941.
