Casualties Pass 311,000

WASHINGTON, July 27 (AP)—Fierce fighting in two hemispheres has pushed the battle casualties of the United States past the 311,000 mark, with more than 63,000 dead.

The cost in men in this war so far exceeds the 278,828 total for World war I.

Rubber Director Dewey Resigns

WASHINGTON, July 26 (AP)—The first war agency head to liquidate his own bureau, Rubber Director Bradley Dewey, declared today that this country's new \$750,000,000 synthetic rubber industry will survive into the peacetime era.

Dewey, who yesterday announced his own resignation and the dissolution of his office on or before September 1, said the industry now was producing at the full rate recommended by the Baruch committee nearly two years ago—about 835,000 tons a year. This is some 250,000 tons more than the country's consumption of natural rubber before the war.

"I can not see any capitalist planting rubber trees and waiting seven years for them to grow," said Dewey. "—against a future of unknown labor costs with chemists who have won every

battle they ever entered between synthetics and nature."

Dewey's exit overshadowed another major rubber development—the disclosure that a deep cut in heavy truck and bus tire rations must be instituted on August 1.

Although 495,000 tires were scheduled for rationing distribution in July, August and September, only 230,000 tires now remain available for the three-month period.
