Rationing Lifted On 12 Farm Items

When the 1945 farm machinery rationing program went into effect on July 20, a dozen items went off the rationing list of farm equipment—corn and cotton planters, row-tie sprayers, potato graders, stationery balers, field ensilage harvesters, portable elevators, grain and forage blowers, milking machines, field hay choppers and harvesters, windmills, listers and listers with planting attachments. Farmers no longer need to secure purchase certificates for these machines from the County Farm Machinery Rationing committee.

Purchase certificates will be required in 1945 on all 19 of the rationed items, but there will be no county quotas on grain drills, potato planters, potato diggers, silo fillers, irrigation pumps, power sprayers, garden tractor, deep and shallow well water systems, power pumps, and farm milk coolers. County quotas will be established on combines, corn binders, corn pickers, manure spreaders, mowers, side delivery rakes, hay loaders, pick-up hay-balers and tractors. With the exception of power sprayers, garden tractors, deep and shallow well water systems, power pumps and farm milk coolers, manufacturers will distribute only 80 per cent of their authorized production with WFA directing distribution of the 20 per cent reserve on the other 14 rationed items to take care of area needs that may develop. The entire distribution of the five items listed as exceptions will be by manufacturers.

A new "Champion" in invasion warfare

STUDEBAKER WEASEL

BUILT BY STUDEBAKER . . . POWERED BY STUDEBAKER CHAMPION ENGINE

YOU'll hear a lot more about this agile new Allied personnel and cargo carrier as our invasion armies roll deeper into Europe. . . Born of war's needs—brainchild of the Office of Scientific Research and Development, the War Department and Studebaker engineers—the Weasel is being manufactured by Studebaker under contract with the Ordnance Department, Army Service Forces. . . It's Studebaker-built—and it's powered by the famous Studebaker Champion engine. . . Officially designated the M-29, it was soon nicknamed the Weasel. And like a weasel it is—in stealth and swiftness—in sure-footed movement on practically any kind of terrain.

PIN-WORMS GO!

New Treatment Gets Real Results

Anyone who has ever had Pin-Worms knows how tormenting and embarrassing this affliction can be, and how hard it is to eliminate the ugly crawling creatures once they get a foothold inside the body. Millions of people—rich and poor, children and grown-ups—have suffered in silence with the misery of Pin-Worms, and doctors have tried for years to find a way to deal with this pest. Old-fashioned worm "cures" usually don't work on Pin-Worms.

Today, thanks to an important scientific discovery (a remarkable drug known as gentian violet), a new and highly effective treatment has been hailed by doctors. This drug is the vital element in P.W., the new Pin-Worm tablet developed by the laboratories of Dr. D. Jayne & Son, America's leading specialists in worm medicines.

P.W. makes it easy to deal with Pin-Worms. The small, concentric P.W. tablets act in a special way to destroy the creatures. Don't take chances with Pin-Worms! Just ask your druggist for P.W., and be sure to follow the directions. P.W. means Pin-Worm relief!
