Rides Buzz Bomb Mrs. Anna Reich, above, won title "Biological Phenomenon" and an Iron Cross, according to Nazi reports, by riding inside robot bomb during early experiments. Lying in almost horizontal position, gazing through periscope, she discovered faults which defied other tests. Her nickname came because she was apparently unaffected by tremendous air pressure, but she was severely injured in her flight.

Farm WAR NEWS Tire Quota Cut To Be Felt Drastic reduction in heavy-duty tire quotas for the three months ending September 30 will affect many farmers since agricultural needs for heavy-duty tire replacements are not included on the number 1 priority list. Tires for hauling perishable fruits and vegetables are given an A-2 priority, but with the over-all quota cut from an estimated requirement of 495,000 to between 190,000 to 230,000, it is anticipated that the number 1 group will absorb the greater share of the supply. Heavy-duty tires are urgently needed by the armed forces, and their requirements must be met. Smaller-sized tire supplies are reported to be adequate for essential civilian needs.

Milk Output Decreasing The production of most manufactured dairy products was lower in 1943 than in 1942 due in part to a continued strong demand for whole milk for fluid consumption in military camps and industrial centers and in part to a one per cent drop in the 1943 milk production compared with 1942. Milk production is now declining seasonally and war demands for exportable dairy products are increasing.
