A resolution adopted yesterday by the Western Association of Fish and Game Commissioners opposed collection of fees for hunting and fishing privileges on lakes formed by federally-built reclamation or flood control projects.

The group also opposed assessment by the federal government of half the proceeds of furs taken on federal lands.

Backers argued the lands were only held under grant by the federal government and actually belonged to the states.

Roosevelt Names Three to Jobs as Ambassadors

WASHINGTON, Dec. 13—(AP)—The White House announced today the resignation of Earl Brown as ambassador to Spain and the nomination of Norman Armour to replace him.

Armour now is acting director of the state department's office of American republic affairs. At the time of the appointment of Secretary of State Stettinius and the reshuffling of the top level of department positions, President Roosevelt announced he would give Armour an important new position.

Armour formerly was ambassador to Argentina. He was recalled several months ago when United States-Argentina relations became strained.

The president, in another diplomatic shift, nominated Laurence A. Steinhardt, now ambassador to Turkey, to be ambassador to the Czech government in exile in London. The Turkish assignment was left open.

Hallett Johnson was nominated ambassador to Costa Rica, succeeding Fay Desportes, who died several weeks ago.

Chairman Connally of the senate foreign relations committee said it was his understanding that Hayes is leaving the diplomatic service and returning to his former connection with Columbia University.

Recently Hayes has been the target of criticism from some groups here who contended he was inclined to deal too leniently with the Franco government.

Send Red Clover to Market, Farmers Urged

Farmers are being urged to sell to dealers or processors any red clover seed in excess of their own needs, while prices are favorable. Even though the amount available from a farm is only five or ten bushels, such amounts added together will go far in relieving the present acute need. Legume and grass seeds are needed both at home and for shipment to our allies. So far, not enough red clover seed is moving into commercial channels. Sufficient supplies must be acquired for lend-lease shipments within the next few weeks, if they are to be received abroad in time for next year's planting.

Lower Poultry Quota Means Less Lumber

In view of the tight lumber situation and considering that Oregon 1945 poultry goals call for reducing the number of laying hens and for holding chicken and turkeys raising at about the level of the 1944 output, the state AAA committee has instructed county committees to give careful consideration to applications for constructing additional poultry facilities. In many cases the state committee points out, new poultry buildings would be unwise expansion under present conditions.

Beef Set-Aside Order Enlarges Application

WFA revised the beef set-aside to include the operations of all slaughtering plants where more than 51 cattle which produce "army style" beef are slaughtered weekly. The revised order became effective December 4, and is intended to create a more equitable distribution of responsibility in furnishing beef for military use.

Heretofore, any number of persons were allowed to slaughter cattle at a plant with no set-aside required so long as the individual slaughterer did not exceed the 51-head minimum.
