RESEARCH WELCOMED

By Charles V. Stanton

A CHANGE in directorship in the Pacific Northwest Forest and Range Experiment station is of more than passing interest. Stephen Wyckoff, an outstanding man in the field of conservation, and forest disease control, has been transferred to the experiment station at Berkeley, California, and his place at the Portland station has been taken by Dr. Alfred Hall, principal biochemist of the Forest service, who has won international reputation for his work in utilization of wood waste. We believe the change to be particularly fortunate, not that we can afford to lose men like Mr. Wyckoff, but rather because the result will be greater emphasis upon experimentation in the field of wood waste utilization.

In the program of education, methods of forest management, plant pathology, and numerous other activities, principally directed to conserve and protect growing timber and to secure fullest use of lands most suitable for timber production, Mr. Wyckoff is an outstanding figure. His achievements in the Pacific Northwest are widely known to men of protection agencies and the timber industry. His leadership was of much influence in the present trend toward reforestation and conservation. The job has not yet been fully completed and his departure to new fields will be keenly felt in the Pacific Northwest, where more conservation-minded leaders are needed. But the foundation has been laid, and there is every assurance that progress will continue as a result of the inspiration furnished by men like Mr. Wyckoff, who pioneered in the science of conservation.

While we regret his departure, there is compensatory satisfaction in the coming to the experiment station at Portland of Dr. Hall, for in him we have an expert in the rapidly developing field of fullest utilization of our timber resources.

Forest conservation means more than growing and protecting trees. Our methods of lumbering are extremely wasteful. We damage much young timber, remove seed trees, and often destroy possibility of natural reproduction. Logs unsuitable for lumber, tree tops and branches are left to rot, creating fire hazards. Even after a log is brought to the mill we waste much of it in slabs, chips, sawdust, etc.

If we can produce something useful out of the tree tops and the waste products of the mill, then we are advancing the cause of conservation.

Dr. Hall in 1930 joined the staff of the forest products laboratory at Madison, Wis., where he carried on biochemical investigations related to production of turpentine and rosin from southern pines. He served as consultant and technical adviser at the guayule rubber project near Salinas, California. He took an important part in securing the alcohol-from-sawdust plant being built at Springfield, Ore.

We have been greatly intrigued by the rapid progress being made in the field of wood conservation and waste utilization. New discoveries are being made almost daily. Plastics, resins, adhesives, and many new products from wood have been made possible through recent research. The Japanese recently announced they have discovered a method for making a high-test motor fuel, suitable for aviation purposes, from pine tree roots.

We are standing at the threshold of a new era in wood usage and it is pleasant to know we have in the Pacific Northwest one of the nation's foremost authorities and experimenters in this particular field of endeavor.

It's simply amazing how much less petulant you feel when waiting while seated instead of waiting while standing.

It's thoughtful little kindnesses like providing seats for hungry waiting patrons that help to soften the rigors of the home front.

Shortest College Team

Coaches hunt six-foot-six boys, but not Kalamazoo College, which won two of its first three starts with a lineup averaging only five feet, seven-and-a-half. Left to right: Paul Hyama, Hazen Keyser, Tom Sugihara, Gus Birtsa and Louie Spitters. Captain Keyser, going up ladder to reach hoop, is five-six. Others are under six feet. Sugihara and Hyama are Japanese-American students. The latter swished 19 baskets in the three outings.

DIAL-LOG

By SUSAN

With the stepped up interest in news from all parts of the world, we thought you might be interested to know that Mutual has seventeen correspondents in all parts of the world to cover the latest developments. Royal Arch Gunnison in the Philippines is perhaps the most familiar name, but here are the other staff members with their present locations: Leslie Nichols, Guam; Arthur Primp, Honolulu; John Hooley, Guam; Arthur Veasey, Sydney; Ed Franke (technician), Guam; and that's the Pacific area group. On the Western front it's Paul Manning, Paris; Seymour Korman, 7th army; Arthur Mann, 1st army; John Thompson, 1st army and John Steele, London, Sydney. Fine is in Moscow, and in the Mediterranean area there are Milton Bracker and David Brown in Rome, and Ted Hoskins covering Cairo and Athens; and the China-Burma-India front is taken care of by Bob Brumby in China and Alfred Wagg in India. Add to that our own wire service and you can see that you are going to get the latest in news just as soon as it is released. That's why it's Mutual, the network for the news... and, of course, KRRR.

Huskies Defeat O. S. C., Oregon U. Downs Idaho

(By the Associated Press) University of Washington Huskies and the University of Oregon Webfoot strolled arm in arm today along victor's alley in the northern division of the Pacific Coast Basketball conference, but Oregon had a challenger looking sternly over its shoulder. Winners in a pair of games over the University of Idaho Vandals Friday and Saturday, Oregon hops the state line from Moscow to Pullman today for clashes tonight and tomorrow with Washington State's Cougars, who served a bit of notice Saturday night they were not to be trifled with. As Washington beat Oregon State for the second time, 42 to 22, and Oregon took a 41-38 decision from Idaho, W. S. C. trounced Eastern Washington college Saturday night 56 to 49, the first defeat of the season for Eastern's giant-killing Savages.
