A delightful piano recital was given on Thursday evening by advanced pupils of Miss Gladys Strong. This program which was given at the Baptist church was the annual public recital and the fifth in a series of spring recitals given during May and June. Withholding Tax Receipts Confused With Security Tax

Many employes have been confusing withholding tax receipts furnished by the employer with social security taxes, according to Charles H. Cannon, manager of the Douglas county itinerate station of the Social Security board. Social security taxes are still 1 per cent for the worker and 1 per cent for the employer, he emphasized. The amount of tax shown on the withholding slip is income tax deducted on the pay-as-you-go basis; therefore, does not include deductions for old-age and survivors insurance.

A statement of wages credited to a worker's account may be obtained by writing the Social Security board office in Eugene, according to Mr. Cannon. "Usually the wages posted to an individual's record are in substantial agreement with the employee's account of his earnings. However, if there is any question whether or not an employer is reporting wages to the social security board, it is advisable to request a record of wages at least every four years," Mr. Cannon stated.

Mr. Cannon will be in Roseburg Tuesday, June 19, from 8:30 a. m. to 2.30 p. m. Through the cooperation of the United States employment service office, an itinerate social security station is maintained the third Tuesday of each month in Roseburg. Anyone desiring information about old-age and survivors insurance or about the social security program should contact Mr. Cannon at this time.

BRAZIL WOODS SHADE WORLD LUMBER MARKET

RIO DE JANEIRO —(AP)— Brazil's potential and untapped wood supply indicates the possibility of a postwar lumber industry which might well overshadow the world market.

Possessing more than 64 per cent of South America's forests, Brazil in the states of Amazonas and Para, alone, has some 260,538,100 hectars, or more than the estimated totals of either Europe (105,859,344 hectors) or North America (70,918,380). A hectar is almost two and one-half acres.
