Sad State
 CHICAGO, July 5.—(AP)—Assistant State's Attorney Leo Poch, who is in charge of prosecuting criminals, stated intently at the group of suspects charged with robberies or holdups who appeared in Criminal Court.

Poch explained he was held up and robbed of \$200 and he will gladly be a complaining witness

instead of prosecutor when the holdup men are apprehended. Butter, mixed with powdered colors, is molded into figures of gods which rule for a night each year in Choni, China.

SAFEWAY'S POSITION ON FOOD PRICES

The end of OPA places every food retailer 'on his own' in determining what his prices will be. We want you to know what Safeway will do.

Safeway will continue to give consumers the benefit of savings resulting from our way of doing business by pricing at the lowest point that will yield a reasonable profit. For many years Safeway's profit has averaged less than two cents on every dollar of sales.

Safeway will do no speculative hoarding. Stores will contain the largest possible supplies of foods at all times and they will be made available to all customers. A comparison on today's and last Saturday's Safeway prices shows that some are higher and some are lower. Most are the same. Many of those that are higher are prices previously authorized by the OPA to become effective July first. With or without government price control, there will of course be price changes in the future with some rising and others falling. Some price rises will result from removal of subsidies which have been paid from taxes. In the case of short supply commodities, such as meat and butter, in which the black market and not ceilings represented the real market prices, increases in legitimate prices will produce larger supplies for legitimate merchants and their customers and will eliminate the black market.
