Darigold Babies are Sunny Babies

The best testimonials to Darigold Evaporated Milk quality are the sunny, sturdy babies who use it regularly in their formulas. But it isn't only babies who are delighted with Darigold. Whoever uses it, senses that here is a truly fine Evaporated Milk. Darigold meets every test with flying colors. In cookery it imparts velvet smoothness and adds rich nourishment to all milk dishes. In coffee it is delicious. And in baby's bottle, it is "just what the doctor ordered" for accepted scientific reasons.* When you buy Evaporated Milk, select Darigold. Discover for yourself how completely good it is.

* In Darigold Evaporated Milk the Vitamin D content has been increased by the addition of 25 USP units of tasteless vitamin D, per fluid ounce. This provides not less than 400 USP units per quart when equal volumes of Darigold Milk and water are mixed. Vitamin D, increases nutritive value for infants, children and adults. Darigold Milk is homogenized for easier digestibility and safeguarded by sterilization and air-tight sealing in the can. Ask your physician for his formula for preparing Vitamin D Increased Darigold Milk for your baby.

ACCEPTED The nutritional claims for Darigold Evaporated Milk are acceptable to the Council on Foods and Nutrition of the American Medical Association.

TESTED The Vitamin D content of Darigold Evaporated Milk is periodically tested by the Wisconsin Alumni Research Foundation.
