In the Day's News

(Continued from page 1)

make it plain that we mean what we have been saying?"

LET'S let a DEMOCRAT answer that question. James A. Farley is in Paris (on a business trip, he says). After "conferring at some length" with Byrnes, he issues this statement:

"President Truman is to be congratulated on his statement. The success of the present (peace) conference, and in my judgment, the future peace of the world depend on backing, wholeheartedly and without qualification, Secretary of State Byrnes and his associates here. This world must have complete confidence in our foreign policy and any action other than that taken by President Truman would have been DISASTROUS."

THIS is Question No. 2: "What will be the effect (of Wallace's dismissal) within the Democratic party and particularly on its chances in November's elections and in 1948?" (Washington is always acutely interested in such things.)

GAIN let us permit a Democrat to answer. William Peacock, an Associated Press correspondent in Washington, says in a dispatch:

"One Democratic senator, talking with the understanding that his name will not be reported, says he thinks it is largely a matter of what the CIO Political Action Committee does."

"He says that no votes are going to be changed by the foreign policy row, but if the CIO-PAC makes only indifferent efforts to get out its votes then the Democratic party may lose some congressional districts where CIO help is required to put over its candidates."

It may be taken for granted that CIO-PAC will back Wallace. It seems reasonable to believe that it will back him with all the weight it has."

ONE more straw in the wind: L'Humanite, French communist party newspaper in Paris, says that scuttling Wallace is a "victory for the war party in America."

Every intelligent American, of course, knows that there IS NO WAR PARTY IN AMERICA. All this talk of a "war party" in America and of "American imperialism" is merely the official communist party "line" as promulgated from Moscow.

AMERICANS like and admire the Russian PEOPLE. Above everything else in the world, we want to get along with them amicably. But so far we have been snubbed in every attempt we have made to be friends.

The snubbing has been done by the communist party rulers of Russia. The PEOPLE of Russia have had nothing to do with it—and will have no say as to whether or not we are to get along.

Work Stoppage Orders Totalled 324 CPA Reports

SEATTLE, Sept. 25. — (AP) — The civilian production administration regional compliance division announced today that work was stopped on 324 projects between August 15 and September 15 with the largest group in central and southwest Oregon. In western Washington, 50 work stoppages were ordered. "Our past six weeks operations show widespread disregard for the law on the part of people building houses," said Gallen S. Geller, CPA compliance division head. "They go ahead and build without priorities and I am of the opinion that most people nowadays know the law."

The name drawing room is a contraction of withdrawing room.

FRIENDS AND FISHING

By CHARLES V. STANTON

Returning from our vacation we found on our desk a post card from a man who, until a couple of weeks ago, was a complete stranger to us.

We were standing on the dock of an Alsea bay fishing resort, stretching the cramps out of our legs after about five hours on a boat seat, when this stranger appeared and asked about our luck, which had been nil. He was quite excited over a scene he had observed a few miles up the stream, where a woman had been flycasting for ocean-run cutthroat trout. An ardent fly fisherman, this stranger made many intelligent inquiries concerning the method of catching these fish. Fortunately, we had our old fishing hat along with its band of cutthroat and steelhead flies and could supply the inquirer with a few of our favorites.

He took us to his automobile, where we met his gracious wife, and where he displayed one of the finest collections of finely-tied rainbow trout flies we have ever seen. We learned he was a Florida business man, now temporarily serving in a government department at Washington.

Armed with cutthroat flies he took off as happy as if he had a million dollars.

Come to think about it, maybe he does have a million dollars.

There is no need to know such information about a man in the sports fishing fraternity.

A millionaire in his fishing togs looks no different than a plumber. You couldn't distinguish a bank clerk from a blacksmith. They talk the same language. They fraternize with an ease which spells the real democracy to be found in men's hearts. The camaraderie of outdoor men is a true spirit of brotherhood—a spirit of share-and-share-alike.

Occasionally, of course, you find a money—a snob. He loves to show off, to brag, to exhibit his wealth or his prowess. But he is not a true sportsman.

The real sportsman has no concern for his fellow sportsman's politics, his religion, his business, nor his social or financial standing. He cares only that he is congenial, tolerant of faults, a conservationist, a good fellow.

The most expert fisherman, if he qualifies as a sportsman, does not hesitate to seek advice from the boy with the bent pin fishhook, if he feels that the boy knows more of fish habits and habitat. He is helpful, courteous and friendly.

He may exaggerate a little, at times, when he tells of his catches. We remember reading somewhere that the fish which got away this season was not as large as the one lost last season, but it will be by next season.

We were glad to get that post card from our newly-found friend from Florida, even though, like ourselves, he reported no luck. Apparently our cutthroat flies didn't do their stuff. He told us he stopped at the Rogue River, hired a guide and went a few miles upstream to try his fly fishing. He didn't catch anything, but we're quite sure he'll be back to try again. He'll remember those big cutthroats the woman was taking from the Alsea. He'll never be satisfied until he too has landed some of those gamey fish. He'll determine by experience his own favorite flies, and he'll return time and again, if opportunity offers, to test his skill.

Perhaps the next time we meet him he'll be the one to give us advice (we've been slipping lately). Some of our friends, upon whom in former years we have passed off our catches, have been making caustic remarks and insinuations about our skill, or lack thereof. Our reputation is suffering.

It is easy to make friends while fishing, so maybe we'd better give the old rod and reel a little more exercise.

If we don't get some fish pretty soon, we'll be needing new friends.

FAIRY TALES—AND POLITICS

By TOM REEDY

FRANKFURT, Germany, Sept. 25. — (AP) — The Germans had an animal show at the zoo the other night. In bitter satire, German players acted out the Grimm fairy tale of Lucky Johnny who didn't know when he was well off and kept trading animals for other animals until he was broke.

The German audience applauded lustily.

With one eye on military government, the other on Germany, land calls a "political cabaret," skits based on political developments. You can't find them anywhere else.

In this one, a tired old frau, well past her prime, came out on the stage and in song and pantomime told how happy she was that she had a bag of gold in her hand. It took her 14 years to get that gold, she sang.

A character in military dress, flashing eyes and sporting a Hitler mustache—what a coincidence—came out of the wings astride a wooden horse. He looked pretty fancy and the frau gave him a how-de-do. He gave her some sweet talk. She gave up with the gold and was happy that she had the wooden horse.

Another chorus of how happy are we and the same Joe came back again. This time he had a paper cow. He told her that the horse wasn't any good and let's swap for a side of good beef. Just as dumb as ever, she swapped and he dashed off. She sang another chorus of how happy are we.

U. S. National Takes Over Bank at Bend

BEND, Sept. 25. — (AP) — The Bank of Bend, established here 10 years ago, will become the thirty-first branch of the United States National Bank of Portland at the close of business Sept. 28.

Announcement was made jointly by Sumner Detrick, president of the local institution, and E. C. Sammons, U. S. National president.

Detrick will become manager of the Bend branch and Carl B. Hoegener, now cashier, will become assistant manager.

The Bank of Bend was organized by the late Frank S. McGarvey, the late C. L. Mannheim and a group of other Bend residents. The bank has had a rapid

growth and its deposits approximate \$5,000,000.

Detrick, who became president in 1942, was formerly an executive in the trust department of the U. S. National at Portland.

The islands of Japan experience more than 25 small earthquakes a year.

ASTHMA and HAY FEVER

Highway Board Remains Firm on Three-Year Plan

PORTLAND, Sept. 25. — (AP) — The state highway commission will not make major additions to its three-year highway construction program, it indicated in rejecting several appeals.

A Salem group, headed by former Gov. Charles A. Sprague, proposed construction of a route from Tigard to Hubbard, crossing the Willamette river at Wilsonville. T. H. Banfield, commission chairman, said the project would cost two and a quarter million dollars and could not be completed within three years. He said other areas of the state are in greater need of highway development.

A Hood River delegation, seeking elimination of dangerous curves on the Columbia river highway, was told that high bids had prevented much work on the route.

A Klamath-Jackson counties delegation, seeking opening up of a route between Medford and Klamath Falls past the Lake of the Woods, was told that when the commission considers its next program the route will be considered.

Portland chamber of commerce representatives, seeking a speed-up on construction of the Banks cut-off to the Sunset highway was told seven contracts have been let this year and that any delays are those of contractors hampered by lack of materials.

Completion of undeveloped links between Pendleton and Lakeview, urged by a group from Lake, Harney, Grant and Umatilla counties, is being speeded as much as possible, the commission said.

Flood Control Unit on Missouri Nearly Complete

GLASGOW, Mont. — (AP) — Army engineers are progressing apace in their fight to control the mighty, muddy Missouri.

A decade ago they built, with 10,000 workmen, the nation's largest earth-fill dam—a mountain of soil, steel and concrete which stemmed the river's vigorous flow and started to bottle the water into a vast, shallow lake here on the Northeastern Montana prairie.

As part of the Fort Peck flood control job, they dug four tunnels through which the river could be diverted, subterranean passages deemed large enough to handle the river during its most untidy moods.

Now they've finished and are testing a giant spillway, an "insurance" project designed to supplement the tunnels. It's a concrete-lined, considered capable of handling any volume of water that conceivably might be produced by any combination of circumstances—a flood far greater than any in the Missouri's notorious record.

Engineers say that, should the occasion ever arise, the spillway itself easily could accommodate a deluge equal to the normal flow of the Mississippi at St. Louis.

Principal features of the spillway project are a mile-long channel and a steel structure. The latter is 800 feet wide—the channel's maximum width—and it supports 16 vertical lift gates each 25 feet wide and 40 feet high (or deep). It is traversed by an automobile highway 86 feet above the spillway floor.

The channel deepens and narrows to about 100 feet, finally disappearing into a stilling pool.

The spillway and gate structure required excavation of 14,000,000 cubic yards of earth and use of 560,000 cubic yards of concrete and 55,000,000 pounds of steel. Engineers estimate the gate and spillway can handle about 250,000 second-feet of water, which is 12,500,000 gallons per minute—almost four times the tunnels' capacity.

Drunken Driving Fine Fixed in Justice Court

Fine of \$100 and a 30-day jail sentence was imposed today on George Castell Black, 43, who pleaded guilty before Justice of the Peace Thomas C. Hartfield to driving a motor vehicle while under the influence of intoxicating liquor.

Woodman Sayre Black, 32, 130 S. Pine street, was sentenced by Hartfield to 10 days in the county jail on his plea of guilty to drunkenness on a public highway.

The Blacks were arrested by state police last night on the Garden Valley road. It was reported by Sgt. Paul Morgan.

Hartfield also reported the arraignment of James Henry Rigby, 33, Riddle, on charges of operating a motor vehicle while under the influence of intoxicating liquor. Rigby was granted a delay in entering plea in order to consult with an attorney.

Herman Steen, Roseburg, was fined \$10 for a defective muffler.

KIDNDIAL-LOG

Beginning next Monday Queen for a Day goes back to its original 11:30 to noon broadcast time. And, speaking of the Queen... the show will be on tour to Minneapolis and Milwaukee between October 25th and November 2nd... Just in case you were planning a trip to Hollywood and hoped to see the show during that time.

Next Sunday is the switch to standard time in the East so you'll find most of your Sunday shows have moved in time. We'll give you a complete line-up on time changes tomorrow.

Wednesday night listening post: Cugat's rumba Rhythms on Spotlight Band at 6:30; "A Hanging for the Cisco Kid" at 7:30; all aboard the Main Line at 8:00; goose flesh and cold chills with the Weird Circle at 8:30.

Note for next Saturday morning... Homemakers' Club gets organized at 8:45, Miss Wanda Thorsen will conduct a fifteen minute program of helpful tips to homemakers each Saturday morning at this time.

"PAPA JOHNSON" SEZ: "Success is ten per cent know how... and ninety per cent know who."

Tax Reduction Not Contemplated

CHICAGO, Sept. 25. — (AP) — Secretary of the Treasury John W. Snyder declared that "for our common good our present tax levels must be maintained for some time."

"This is inescapable if we are to achieve a balanced budget and a surplus to be used to reduce the public debt," Snyder told the American Bankers Association in a prepared address.

"I think that it is pure fantasy, if not plain demagoguery to talk of tax reduction and debt reduction in the same breath."

The treasury secretary told the bankers that in the "present economic environment the federal government should direct its primary effort on the fiscal front to achieving a balanced budget."

"Better yet, it should strive to achieve a substantial surplus of taxes over expenditures to apply to debt reduction. These are the views I expressed the first day I entered the treasury; and they have the full support of the president."

He said the treasury from Feb. 28 until Sept. 1 had reduced the debt by "about 14 billion dollars as the result of heavy payoffs made on maturities of marketable securities each month."

Many Construction Supplies Remain Short

WASHINGTON, Sept. 25. — (AP) — The commerce department forecast today that supplies of lumber, cast iron soil pipe and plumbing fixtures for housing and non-residential construction will "remain short during 1947."

On the other hand, the department said, supplies of brick, tile, concrete block, clay sewer pipe, warm air furnaces and cast iron and convectors radiation are now nearing demand.

Lumber consumption, including millwork and flooring, for the last half of 1946 and for all of 1947, will total 37,750,000 board feet, the department estimated.

"UNBLOCK" your DIGESTIVE TRACT

And Stop Dosing Your Stomach With Soda and Alkalizers

Don't expect to get real relief from headache, sour stomach, gas and bad breath by taking soda and other alkalizers if the true cause of your trouble is constipation.

In this case, your real trouble is not in the stomach at all. But in the intestinal tract where 80% of your food is digested. And when it gets blocked it fails to digest properly.

What you want for real relief is not soda or an alkalizer—but something to "unblock" your intestinal tract. Something to clean it out effectively—help Nature get back on her feet.

Salem Sewer Delayed By Concrete Shortage

SALEM, Sept. 25. — (AP) — City Engineer J. H. Davis said today that the city cannot build an interceptor sewer, which would relieve pollution of the Willamette river, before next year. He said the concrete shortage is the main obstacle.

His statement followed a report from the state sanitary authority

which strongly condemned the city for polluting the river.

Presidential Plums

KANSAS CITY, Sept. 25. — (AP) — A jar of regular Damson plum preserves with a special label brought a high bid of \$2 at the Women's City Club annual harvest festival here.

The preserves were contributed by Mrs. Harry S. Truman, and bore a White House label. Mrs. Harold W. Falls was the high bidder.
