SERVING THROUGH SCIENCE

See Your U. S. Tire Dealer
TodayTAKE A DEMONSTRATION RIDE ON
TOMORROW'S GREAT NEW PREMIUM TIRE

If you drive a car, you should discover what it means to ride on the new U. S. Royal Air Ride Tire.

And you can do just that—today! Although the Air Ride has not yet been released for sale, your U. S. Tire Dealer is waiting now to take you for a demonstration ride in an Air Ride-equipped car . . . waiting to let you experience an entirely new and thrilling kind of tire performance!

Your first mile on these great new premium tires will tell you that here, indeed, is a new kind of driving ease and comfort. You're riding on more air—a substantially bigger, noticeably softer air cushion.

But that's only the beginning. That sense of control, of smooth, effortless handling, tells you that the Air Ride is a magnificently balanced tire—swift, nim-

ble, "light on its feet"—responsive to your slightest touch on the steering wheel. Try a sudden stop. When you touch your brakes, the Air Ride stops fast! For it has the exclusive U. S. Royal Brake Action Tread—with literally thousands of sure-gripping, swift-acting tread surfaces to wipe away road film and bring you to a safe, straight-line stop.

You'll agree there never has been a tire like this before. Building the Air Ride requires new molds, new machinery, new methods—but we hope it won't be too long before the Air Ride is offered for regular sale.

In the meantime, see your U. S. Tire Dealer! Stop in today—actually ride on this dramatically different premium tire—prove for yourself that the Air Ride is the tire you'll want to ride on for keeps!

AVAILABLE NOW! U. S. ROYAL Air Guard TUBE

AMERICA'S NEWEST SAFETY INNER TUBE

At last—you can equip your car with true safety inner tubes at moderate cost! The new U. S. Royal Air Guard tube gives you new protection against sudden flats, loss of car control.

Ordinary tubes tend to pull away from a puncturing object—the hole becomes larger, frequently tears wide open before there's a chance for a safe stop. The Air Guard puts more rubber into the critical puncture area—rubber under compres-

sion. When punctured, this extra rubber squeezes tight around the object—keeps air inside where it belongs.

The U. S. Royal Air Guard is a 100% Butyl tube—for better air retention, less frequent inflation, longer and safer service.

Chances are, your U. S. Tire Dealer already has your size in stock. For safety's sake—switch today to new U. S. Royal Air Guard tubes all around!
