Has your car got
HUNGER PAINS?

... due to poor diet
Malnutrition saps any car's energy,
slows down its performance. You'll

recognize the prevailing symptoms.
Here's how easily ailing cars can be
made happier by proper feeding.

PINGITIS

If your engine pings protestingly, the condition is often pingitis, due to deficiency of octanes. To restore smooth operation, administer New Mobilgas Special by tankfuls.

LACKAPEPA

When the patient refuses to roll over in the morning, the diet probably includes too many heavy elements. Use of a balanced fuel such as New Mobilgas Special provides extra energy at any time of day or night.

HEATITIS

High temperature following only normal exertion is often the result of a diet of high octane only, without other essential elements of a balanced food. Regular diet of New Mobilgas Special helps keep temperature normal.

GUMITIS

Gum stickiness causes engines to become sluggish, hard to awaken, and indicates internal congestion. By removing excess gum from the diet, through the use of New Mobilgas Special this condition is quickly improved.

The Flying Horsepower you get from New Mobilgas Special results from the same type ingredients that gave the superior Fighting Power to our 100 Octane Aviation Gasoline. You cannot get a better balanced gasoline than New Mobilgas Special. Try a tankful today.
