Steelhead Egg Take, Count of Fish Reported

The take of steelhead eggs by the Game Commission's spawning crew has reached the 900,000 mark at Smith River falls in Douglas county. The eggs are being eyed at the Bandon hatchery and then will be hatched at the Rock Creek hatchery on the North Umpqua for planting back into the same system. The take of steelhead eggs at the Rock Creek hatchery totals 187,000 to date.

The fish counting station operated by the Fish and Game Commissions at Winchester dam on the Umpqua river reports that 11,072 steelhead have been counted over the dam since October 23. This figure almost doubles last year's count of adult steelhead for the same period. Recently there also was a sudden spurt of Chinook migration over the dam and as of April 30, 626 salmon had been counted. Last year's count for the same period was 224.

GETS IN THEIR HAIR NEW YORK, May 13.—(AP)—John Sebastian's recording of Claude Debussy's "Girl With the Flaxen Hair" is being taken off

the market because heirs of the late French composer felt Sebastian's instrument "did not show as much respect for the selection as the piano, for which it originally was written."

Sebastian plays the harmonica. He learned of the action yesterday from Henri Elkann, representing Debussy's Paris publishers, and the RCA Victor Record Co.

A LESSON IN TROUBLE SHOOTING "USE WESTERN" OIL FILTER PACKS

The best way to protect your engine from trouble is to keep it clean. Western Filter Packs are built by the famous "V" process, all having the use of larger quantities of filtering material. They are NOT chemically treated, which means that they will not have any effect on the oil in the oil.
