Many cars today are 4 years old or older. And whether we realize it or not practically EVERY ONE of those cars—yours included—may have a bent frame, axle or wheel, or dangerously worn steering parts, or wheels that are dynamically unbalanced. Those are major causes of our mounting accident toll, records prove. They make tires wear quickly and unevenly, causing sudden blowouts and loss of steering control... and disaster.

That's why every car—yours included—needs our Bear Safety Check-Up and Correction, now, before accident strikes. Get that check-up here today on our scientific Bear Equipment, quickly, accurately, reasonably. Then you will not only be safe, but you will get UP-TO-DOUBLE tire mileage!
