SAFE "Black-heat" FOWLER ELEMENTS insure a longer life water heater!

Fowler's "black heat" elements do a better job of heating water. They do it fast, and more efficiently than any other type element.

Unlike the immersion type, the Fowler element surrounds the tank and never becomes red-hot. Extra footage of large size wire applies the same heat units over a wider area. Fowler elements last longer because they operate at a trouble-free, safe, black heat.

Efficient 3-way insulation plus Fowler's long-life elements insure low operating cost. The "porcelined" tank keeps water clean, free from tank rust. Hot water temperature can be adjusted to suit your needs. See about your new Fowler today.
