the FEED BAG Vol X Published Weekly by the Douglas County Flour Mill, Makers of UMPQUA CHIEF FLOUR and Umpqua Brand Poultry and Dairy Feeds Mar. 22 1948.

Atomized Vitamins The Douglas County Flour Mill has always kept up with the parade and usually in the lead. We have been "FIRST" with many improvements that are now in common use. We made the first commercial turkey feeds on the Coast. We were first to use cod liver oil in poultry feeds, and so on down the line.

Now we are first with another great improvement. You can take vitamin pills, but you wouldn't want to give one-day to each of your cows, your chickens and your turkeys. Wouldn't leave you much time to milk and gather eggs, would it?

The business of adding a few ounces of this, a couple pounds of that, and a pint or two of the other thing, always leaves everybody wondering if the dispersion of these tiny amounts could be perfect, so that every pound of feed contained the right amount, or if maybe one pound might have a big slug and the next none.

Now, there is no guess work. We use liquid vitamins, and they are sprayed in a fine mist into the feed while the mixing machine is going at full speed. Six nozzles, all working together, do a thorough job of covering every square inch of the weighing mass of feed in the mixer with the life giving vitamins.

Now, every sack, every pound, every handful of feed will have its full exact amount of vitamins, and your animals and birds will be sure to get their one-day portion of vitamins, instead of maybe a big shot one day, and maybe none at all the next day. That is, if you buy their feed from the Douglas Flour Mill. We have the only machine of this type in the Northwest. Of course, everybody will have them soon, but to get the benefit this year, get UMPQUA FEEDS, and be SURE.

And Something Else New A long ride with your favorite saddle club, a day on the drill field, or a day handling sheep or cattle takes a lot of energy out of your saddle horse. To replace that spent energy, and to keep your saddle pal in good condition with a nice sleek coat and a lot of ambition requires more than just simple oats and hay.

A horse working that hard, and responding to all the calls you make on him needs a balanced ration, just the same as you do, or the same as your income producing stock. At the Douglas Flour Mill we have realized this for some time. We have made investigations, and now have built a special feed for your saddle horse.

From the best nutritional experts we have found what your horse needs to give you the service you ask of him. These needs are all incorporated in this new feed. Next time you get new feed for your "Friend of the Trail," come to the Mill and ask for "SADDLE HORSE DELIGHT."

Teacher: "What is the difference between caution and cowardice?"

Observant Tommie: "Caution is when you're afraid, and cowardice is when the other fellow's afraid."

The Good Old Daze In cleaning out the desk the other day we ran across an old ad that came out four or five years ago. Says: "More cockerels should be raised this year. We guarantee 14 cents per pound. You can't go wrong on this."

We can echo about all of that statement today. Except, we can't guarantee 14c a lb. But we do guess that the resultant fryers will fetch 38-40c. Egg mash was \$2.10—now it's \$3.00. We'll let you take it from there. Still looks like you "can't go wrong."

During Meat Rationing Customer: "I'm so hungry I could eat a horse." Waiter: "You couldn't have come to a better place, Sir."

Ever notice when you start talking about yourself so many people stop listening?

"Did your wife have much to say when you got in at 4 this morning?"

"Now, but it took her a heck of a long time to say it."
