Your Best Crop Insurance

The best way to make sure of a good crop is to make GOOD SEEDBEDS. And the best way to do this is to use a farm-size SEAMAN ROTARY TILLER. It does these things:

- pulverizes the soil thoroughly and uniformly;
- mixes fertilizer and humus into the growing area of the seedbed where it does the most good;
- helps to increase nitrogen supply through complete seedbed aeration;
- hastens and promotes more complete germination of seed; helps to maintain higher seedbed temperatures;
- doesn't leave any air pockets or hard plow soles to retard plant growth;
- keeps moisture in the seedbed for a healthy stand;
- helps to destroy many crop pests and certain varieties of fungus;
- provides effective weed control when operated with hood open.

ALL THIS . . . with one implement, supplied in a complete range of sizes from 3 ft. to 6 ft. tillage widths, power-take-off and motorized (gas or diesel) models. Write for full information . . . and see your local SEAMAN Dealer.

Motorized models (gas or diesel powered) are available in 4-ft. to 6-ft. tillage widths.

Power-take-off models are available in 36", 42", 48", 60" and 72" tillage widths. A top-rated two-pow tractor will handle the 36" tiller and a top-rated 3-pow tractor will handle a 42" Seaman Tiller.

Let us tell you more about this remarkable piece of tillage equipment and show you its many excellent mechanical features. Drop in and let's talk it over man to man.
