**BLACK HEAT** elements give your water heater **Longer Life!**

**FOWLER HEATING ELEMENTS SURROUND TANK**  
—No Immersion  
—No Red Glow

Because the heating element on a Fowler Electric Water Heater is designed to operate "black," you are assured of a long-life heater. The element surrounds the tank, contacting it with a broad surface heating area which enables lower element temperatures and prevents the trouble-making red glow. Non-immersion of the element into the tank makes unnecessary the cutting of entries, thus eliminating sources of service trouble. High efficiency insulation combines with the highly polished aluminum reflector, which reflects the heat rays back into the tank, to reduce heat loss to a minimum. Fowler's economy temperature control is automatic and adjustable to your water temperature preference by simply turning the dial. Porcelaining the glass-like inside finish, keeps water ever clean. And with delivery of your long-lasting economical Fowler Electric Water Heater, you receive a 20-year replacement guarantee. Place your Fowler order today.
