

GOOD HARVEST—A bountiful supply of many varieties of vegetables comes from this garden at the home of Mr. and Mrs. George R. Singleton, 852 Hoover St. The Singleton table has had no lack of fresh garden produce almost all year. The upper picture shows a patch of tall corn, where Mr. Singleton picked 67 ears only this morning. The lower picture shows another part of the garden, where tomatoes, beets, onions, carrots, cucumbers and melons grow. The garden has many berry vines. Mr. Singleton's prides are his strawberries and grapes. The garden is an example of what can be done on a city lot, but it takes much cultivation.

Bean, Hop, Fruit Pickers Needed In State This Month

About a thousand additional bean pickers can be used in the Eugene, Albany and Lebanon areas during the coming week, but the peak farm labor demand will be reached in about two weeks with late hops, beans, pears and prunes vying for help.

This was the result of a survey of 30 farm labor offices by Earl R. Lovell, director of the State Employment Service. Families with camping equipment are needed most but exact information about accommodations, wages and other conditions may be obtained at any local office.

Principal demand for the thousands of outside hop pickers will come from the Grants Pass area about August 23, and Eugene and Salem a week or ten days later, according to reports reaching state headquarters. Early hops already are being harvested.

The Freewater district will need about 500 more prune pickers for a two week season beginning August 24. Camping sites are available, but single men only can be used.

Pear picking also will start about August 20 to 25. Medford is asking 1,000 out-of-area pickers and Hood River 300. Cabins and camping space are available.

Besides the wide demands for bean and hop pickers near Salem, peaches, prunes, mint and beets will help occupy workers in this area most of September with nuts and other harvests coming along in October.

Poultry and Egg Prices On Roseburg Market

Price of colored fryers took a slight drop on the Roseburg poultry market today. Producers were receiving one cent less from processing houses. Other poultry and egg prices remain the same.

Today's prices follow:

No. 1 Colored fryers, 3 pounds and up, per pound	\$4.31
No. 1 Leghorn broilers, 3 lb. and up	32
No. 1 Colored hens	31
No. 1 Leghorn hens	29
No. 1 Colored roasters	28
Frying rabbits, 4 to 6 pounds	25
Large eggs, per dozen	33
Medium eggs, per dozen	30

Estimates of the time it will take to restore war wrecked Berlin range up to 30 years.

Mrs. Sadie E. Geiwitz Of Happy Valley Dies

Sadie Elizabeth Geiwitz, 67, resident of Happy Valley, died Aug. 13 after a short illness. She was born Aug. 24, 1880, in Glenwood, Iowa, and came to this community three years ago to make her home. She was a member of the Methodist Church.

Surviving are her daughter, Mrs. Lewis Meeham, Roseburg; three sisters, Mrs. Dora Johnston, Pasadena, Calif., Mrs. Margaret Smith, Packwood, Iowa, and Mrs. Ida Cox, Pasadena; four brothers, Ed Walling, Retül, Wash.; Thora Walling, Los Angeles; Warren Walling, Pasadena; John Walling, Los Angeles, and three grandchildren.

The body will be shipped by the Roseburg Funeral home to St. Joseph, Mo., for funeral services and interment.

Ram Sale Prices Show Big Increase Over 1947

PENDLETON, Ore., Aug. 16.—(AP)—Bidding at the 22nd annual ram sale here Saturday pushed prices an average of \$28 a head higher than a year ago, sale officials reported today.

The 307 bucks brought an average of \$113.08 as compared with \$85.10 paid for 265 animals last year.

Highest price was the \$260 paid by Coffey Ranch, Baker, Ore., for five Ramouillets. Consignor was John Withers, Paisley, Ida. Spring Valley Livestock Co., Caldwell, Ida., was the largest buyer, taking 27 head of Suffolk. The company also paid the top for Suffolks of \$225 a pen for five consigned by Glenn Cox of Philomath.

Second Spray For Filbert Worms Due Before August 20

The second spray for the control of filbert worms should be applied prior to Aug. 20, according to J. Roland Parker, county extension agent, Entomologists of the Oregon State Experiment Station report filbert moths are again active and laying eggs which will hatch in about eight days. The same materials used in the first spray are recommended and thoroughness of application is essential for good control.

Where a spray is used, lead arsenate, 3 pounds to 100 gallons of water, or DDT used at the rate of 2 pounds of 50 per cent wettable powder to 100 gallons of water is recommended. For growers who use a dust, a 40 per cent lead arsenate dust or a 5 per cent DDT dust should be applied at the rate of 40 to 50 pounds per acre.

The filbert moth larvae feed only on the under side of the leaves before they enter the nuts and it is important that the undersides of the leaves be covered with the spray or dust to secure effective control. Where DDT is used as a spray or dust the ground under the trees should be covered to kill moths as they emerge from the soil.

Some prospectors have sunk 20 miles off land in the Gulf of Mexico.

Prompt Return of Farm Practice Report Urged

All farmers carrying out practices under the Agricultural Conservation Program are reminded by J. F. Bonebrake that reports should be turned in at the county office as soon as all practices are completed.

Every effort should be made by cooperating farmers to complete all possible practices according to specifications so they will qualify for assistance payments.

When specifications are followed carefully the best long term results will be obtained. All practices offered in the 1948 Program help conserve our agricultural resources and help keep farming on a paying basis, Mr. Bonebrake explained.

Inspection and office work will be simplified if members report promptly all work completed, as well as all work that cannot be carried out.

A New Farm Power Leader

Here's the power leader of Oliver's new, modern tractor fleet. It's the husky 3-4 plow "88" with a 6-cylinder engine and six forward speeds to provide you with a practical working pace for every farm operation.

The "88" is an ideal unit for concentrated farming... for all the heavy "rush" jobs season after season. To suit your fuel situation, Oliver offers three great engines: (1) for gasoline, (2) for tractor fuels, (3) diesel... designed specifically for a farm tractor and available later.

Look at these new features: direct drive power take-off, Oil Miser transmission case, floating oil pump screen inlet, 20-gallon fuel tank, battery ignition and automatic spark advance, basic interchangeability of Oliver's full line of centrally mounted and rear suspended tools and a choice of interchangeable cast iron or stamped steel wheels with all other new Row Crop models.

Let us give you the details on all the valuable farm-utility features found on Oliver's new farm-engineered tractor fleet, built in Row Crop, Standard, Row Crop with Adjustable Front Axle or Single Front Wheel models.

Price of Wheat Continues Under 'Support Level'

By WILLIAM FERRIS
CHICAGO, Aug. 14. — (AP) — Wheat is selling today below the government's theoretical "floor" in most parts of the country. Efforts to hold up the price have bogged down under the weight of heavy sales and lack of storage room.

Recent support efforts have included increases in scheduled exports for September, an official statement that the crop year's export goal will be raised above original intentions, and an Agriculture Department campaign to get producers to hold wheat on farms.

But the price of wheat continues below the "support level." The government supports wheat mainly through a loan, based upon 90 per cent of parity. Loans at various terminals are now in effect. Grain experts believe farmers have applied for loans in very large number, but official figures have not been issued.

Major cause for the slump of wheat below the loan, grain men said, appeared to be inability to obtain storage room. To get the loan, wheat must be stored to meet government specifications. With storage space filled, some wheat has had to be dumped on the market.

However, the government also will give farmers purchase agreements on wheat at the same price as the loan. The pro-

ducer has the option to deliver the wheat to the government at the loan price any time before May 30, 1949, storage requirements are not as exacting as under the loan.

This year's loan price is the highest on record. Since the program was started in 1938 the loan has increased each year.

Meanwhile, some grain trade sources criticized the loan program. One grain house said, "the whole support program was started at a time of reduced agricultural income, and was designed to prevent disaster to the farmer but was never intended to assure him higher prices year after year."

Veteran Woman Aide At State Fair Still on Job

A gracious lady who has been directly associated with the Oregon State Fair for nearly half a century will again be on hand to welcome visitors to the 1948 exposition in Salem, September 6 to 12. She is Mrs. Ella S. Wilson.

who was first associated with the state fair in 1903.

Mrs. Wilson, who now acts as personal secretary to Manager Leo Spitzbart, was secretary of the fair during the years from 1922 to 1931. During her long term of service she has witnessed the construction of each one of the fair's fifteen major buildings. Mrs. Wilson can well remember when the week long crowds at the fair about the turn of the century numbered less than 40,000 as compared to the 250,000 persons who have attended both the 1946 and 1947 expositions.

Hen Lays Two Eggs At Time, Joined by Third

Mrs. Lee Pillion, Lookingglass Rt., owns a hen that outdid herself in laying eggs Sunday. The hen, a seven-month old Rhode Island red, laid two eggs at the same time. The two eggs were joined by a third egg just forming. The eggs were soft shelled. Then hen has been laying eggs for just a month.

BIGGER CROPS START RIGHT HERE!

In Seed Beds Prepared by ROTOTILLER

POWER TILLER OF A HUNDRED USES!

No crop can be any better than the seed bed that feeds it. And no other type of tool can make seed beds as fine, as rich, and as moisture-conserving as this rotary tiller. Here are the reasons.

Only this modern method breaks up and pulverizes both soil and humus and mixes them so uniformly, making a rich mulch just as shallow or as deep as you want it. It works in the driest, hardest soils, or in ground too gummy to yield to the plow. It makes a finer surface mulch, capable of absorbing and retaining moisture. It does all of this in one simple operation. Come in, we will gladly explain the many additional uses, both with and without various specially-designed attachments, for ROTOTILLER—Power Tiller of a Hundred Uses.
