Republic of Korea (South Korea). The vote also continued a U. N. Korean commission and instructed it to seek again to unify Korea. Russia has barred the U. N. commission from Northern Korea where she has set up a "people's republic."  
Vishinsky, who has lost every major fight with the west in the assembly, tried vainly to do away with the Korean commission. On this proposal too, the vote was 46 to six against him.

The end of the Paris assembly, the longest so far in the world body's history, found the western powers and Russia further apart than ever.

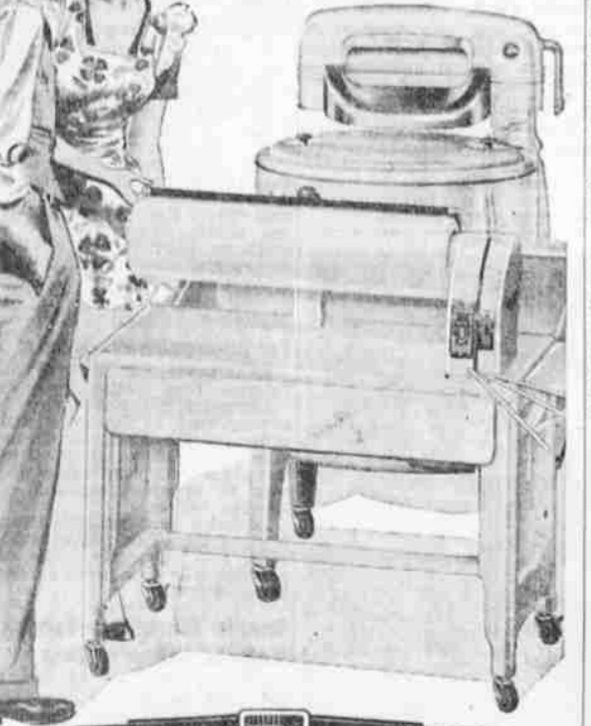

But many delegates said they were relieved. They said they had arrived in Paris last September fearing war might break out; they are going home feeling more optimistic about peace.

### U. S. Ready to Write Off China as Total Loss

of the United States and Canada and the five Western European Union countries—Britain, France, Belgium, the Netherlands and Luxembourg—settled down to work in earnest on the drafting of a North Atlantic military alliance.  
When completed and if finally accepted by all interested countries, it would commit this nation to assist the European members against attack from any quarter—meaning Russian aggression.

The security talks now being resumed are part of a broad pattern for making Western Europe so strong that eventually it will be able by its very success to break down the barriers to Eastern Europe. American authorities, though they talk little about it, are counting heavily on that concept to restore the traditional balance of power in Europe and to some extent in the world.

Evidently they attach no such importance to China in terms of cold war strategy. Their attitude toward the situation there is that Communist successes are evidence not so much of China's strength as of Chiang's weakness.
