

1st Aid Training Set for Douglas Industrial Firms

The accident prevention division of the State Industrial Accident Commission has scheduled four series of first aid training classes for Douglas County industrial firms. Paul E. Gurske, Salem, chairman of the Commission announced today.

Each course consists of eight two-hour lessons. Class enrollees who qualify are given first aid certificates as issued by the commission in addition to American Red Cross certificates.

The first class starts Monday, Feb. 21, for the employees of the Harbor Plywood Corporation at Riddle. Following is the complete schedule as arranged by H. M. Stevens, Roseburg, field man for the accident prevention division of the commission:

Harbor Plywood Corporation, Riddle, Feb. 21, 24, March 1, 4, 9, 14, 17 and 22.

Douglas County Lumber Company, Roseburg, (afternoon classes) Feb. 22, 25, March 2, 7, 10, 15, 18 and 23.

Coon Creek Lumber Company, Roseburg, (evening classes) Feb. 22, 25, March 1, 7, 10, 15, 18 and 23.

A. F. Saar, Inc., Roseburg, Feb. 23, 28, March 3, 8, 11, 16, 21 and 24.

Robert Lafky, Salem, has been assigned as instructor of the Douglas County series.

Gold Star Mothers to Meet—Roseburg Chapter, American Gold Star Mothers, Inc., will meet Thursday, Feb. 17, at 2 o'clock at the Armory, at which time membership cards will be given out and Paul Jenkins, News-Review photographer, will be present to take pictures. Mrs. Martha Wells, president, asks all members to be in attendance.

Oh, what a beautiful warming!

THIS sounds like magic—and that's exactly how it feels to Packard owners!

For winter driving in blessed comfort, you simply turn a dial to the temperature you want. The rest is automatic...

Instantly, the car is uniformly filled with gentle, refreshing warmth. No blast of heat on your ankles. No drowsy haze at shoulder level—no chilling drafts or frigid floors.

You breathe fresh air... air that's changed completely once every minute. You enjoy new comfort. And new quietness... because you drive with windows closed. And new safety... because window-fogging problems are gone forever.

Come in—see a demonstration of this years ahead feature!

License for Indians

The Senate voted 18 to 11 to compel Columbia River Indians who live in Washington to buy fishing licenses when they fish on the Oregon side of the river.

The bill was asked by the State Game Commission, but was opposed by some senators who thought it violates the 1855 Indian treaty with the United States. It now goes to the House.

Sen. Elmo Smith, Ontario, said Oregon Indians have to buy licenses to fish in Washington, so the Washington Indians ought to pay when they come to Oregon.

Sens. Russell Gardner, Newport, and Ben Musa, The Dalles, introduced a bill to let the governor appoint a state housing administrator at \$6,000 a year. The administrator would coordinate the work of local housing authorities throughout the state.

districts with the greatest fire hazard.

The 1948 membership showed a slight increase over 1947, representing 379,034 acres as against 326,615 acres for 1947. An additional 342,885 acres were patrolled and collected made through the tax roll. Patrol of 423,267 acres of O. and C. Land lands also was handled, making a total acreage protected of 1,145,286.

A total of 29 fires occurred during the season as against 36 in 1947. Classified as follows, the fires included: Lightning, 5; incendiary, 6; smokers, 3; debris burning, 1; logging, 6; miscellaneous, 8.

Several improvements were made during the 1948 season, including construction of the Elk Creek and South Douglas stations, at a total cost of \$24,129, as well as construction of additional roads, telephone lines, trails and maintenance of buildings, cabins and lookouts.

An audit report of the association's records was submitted by John Y. Richardson and Co., certified public accountants.

Births Announced at Mercy Hospital

BOYD—To Mr. and Mrs. George Boyd, 1822 Hick Street, Roseburg, Feb. 22, a son, Jack Keith; weight seven pounds, four ounces.

EMEN—To Mr. and Mrs. David Eman, Sutherland, Feb. 14, a daughter, Valerie Jessie; weight two pounds, seven ounces.

ADAMS—To Mr. and Mrs. Myron Adams, Sutherland, Feb. 15, a daughter, Barbara Pearl; weight six pounds, four ounces.

O'NEIL—To Mr. and Mrs. Donald O'Neil, Route 2, Roseburg, Feb. 15, a son, James Donald; weight seven pounds, 10 ounces.

Warm Rains, Winds Bring Snow Threat

(Continued from Page One)

their foundations last week.

Winds Sweep Northwest

Strong winds were blowing over most of the Northwest and the weather bureau predicted they probably would continue through the next two days. The storm was centered off the British Columbia Coast.

Streams were rising throughout the region. It was too early to start heavy runoff into the ice-clogged major rivers from the mountain snow packs, but the threat of localized floods in lower regions was increasing by the hour.

The Willamette River and its tributaries were rising in Oregon but no flood danger was foreseen yet.

The Palouse Country in Eastern Washington and North Central Idaho were watching the small streams which caused heavy flood damage last February. They were rising again and the snow pack is heavier than it was last year.

Coal Supplies Dwindle

The Union Pacific Railroad line into Moscow and Pullman was still plugged with snow for the third day. A rotary plow that was to have cleared the way for a shipment of coal from Utah broke down yesterday.

At Moscow, the city's main hotel, hospital, federal building and many homes reported their coal would not last more than a day or two. Five sorority and fraternity houses on the University of Idaho campus were without coal entirely.

The Coeur D'Alene mining district around Wallace, Idaho, prepared for new slides like the ones which recently isolated the town of Burke. Rain and wind in Wallace made the slide threat more serious.

Sand and water pouring down a gully swept against houses and over Spokane, Portland and Seattle railroad tracks at Wishram, Wash., today.

A bulldozer is attempting to divert the water which broke through a bank yesterday.

Houses are being damaged and secondary tracks of this subdivision railroad terminal town southwest of Goldendale are covered.

Problems Still Faced By Girls at Hillcrest

(Continued from Page One)

which may be attained through this cooperative spirit.

Another signal recognition which Hillcrest received was the recent choice of this school as one of six in the entire United States to receive an exchange school worker from France. Six schools were chosen as outstanding examples of corrective institutions for study by these workers from Europe, and Hillcrest was one of those schools. As a state we should be proud of this honor.

Needs Only Partly Met

A great deal of money is being expended in the construction of new buildings and facilities for the large population at the school, but this will not take care of the entire problem. Among other things the citizens of the state need to understand and give moral aid to this group. As an example of misunderstanding, I heard one person exclaim in horror when he noticed the cement underground tunnels which are being constructed to connect the various buildings on the campus. His immediate impression was of girls being herded through dark underground passages like animals. He didn't realize that it was to prevent the present situation where the girls during several months of the year must plod through mud and rain, putting on and taking off rain coats and boots to go from one building to another. Also the underground passages permit of more freedom and less need for guards.

Hillcrest needs badly well enclosed outdoor spaces for recreation. As long as the run-away problem still exists, it is necessary to confine many of the girls to indoor exercise when there are not sufficient attendants to supervise outdoor activity. This, too, will take money but as a measure for improved health it needs to be done yet.

The new buildings now in construction will help take care of the overcrowding of girls in rooms not adequate to care for them and to provide new school facilities; but as you can see, many other projects are always on tap and these cost money, and money means taxes and we don't like to talk about it. But Hillcrest is doing a job that can't be done any other way. It is only capable of being estimated in its value to human lives, today and in the future.

Timber Executive To Attend Advanced Course

Robert P. Conklin, North Bend, district manager for the Weyerhaeuser Timber Co., who is in charge of the company's interest and activities in Douglas County, has been appointed by the company to attend the 15th session of Harvard University's advanced management program. The announcement from the timber company's head office in Tacoma states that Conklin will enroll for the 13-week course, designed for broad training in administrative procedure. The course runs from Feb. 21 to May 21.

Boy Scouts of Tenmile To Hold Box Social

Boy Scout Troop 126, Tenmile, is holding a box social at the Tenmile Hall Friday, Feb. 18, starting at 7:30 p. m.

Women and girls are asked to bring box lunches, which will be auctioned off to the men and boys by Dennis Johnston and Donald Nicklason. Proceeds will be used to purchase much needed equipment for the troop.

Soft drinks and coffee will be served free with the box lunches. Dance music will be furnished by the Hoot Owl orchestra, which regularly plays for the Tenmile dances.

By SHERMAN PLIMPTON

An industrial designer in Chicago is setting a new high for ambition. With the possibility of rocket and space ship travel in the near future, he's filed a claim to all outer space. That includes everything from here to there and on both sides of it. Officials say he might even get it, because no one else has thought of applying for ozone real estate. If his claim is upheld he intends to promote peace by barring rockets from space. It would be tougher to make that stick than a used postage stamp. However, he's got something and it's out of this world. Maybe he's trying to build castles in the air.
