GOOD NEWS FOR FIDO

LOS ANGELES (AP)—Is Fido a fleabag? Vitamin B-1 is the answer.

So says Dr. C. J. Lunsford of the University of California, in a report to the California Medical Association convention. The doctor said B-1, given either by injection or mouth, repelled fleas in from six to 22 hours.

The Japanese Current
Sailors call the Japanese Current the "Gulf Stream" of the Pacific Ocean. The stream crosses the ocean and warms the northwestern shores of the United States.

Polish Representative To U. N. Spy In A-Bomb Field, Ex-Military Aide At Embassy Tells Senate Hearing

WASHINGTON, May 11.—(AP) The former military attache of the Polish Embassy here testified Tuesday that a Polish representative to the United Nations was sent to this country "to do espionage in the atomic bomb field."

He called the Polish Embassy "the center of a spying apparatus and subversive activities directed against the United States."

The statements were made to a Senate Judiciary subcommittee by Gen. Zygor Modelski. He said he came to the United States to "try to expose" what he called a network of Communist activities here and has been working closely with Army Intelligence.

The subcommittee is conducting hearings on a bill by Senator McCarran (D-Nev.) to tighten America's immigration defenses. Modelski identified Ignacy Zlotowski as the Polish United Nations representative he said had been sent to this country to carry on espionage in the atomic bomb field.

Modelski said that during the war, Zlotowski was in France "with Curie Joliot, head of the French Atomic Commission and a prominent member of the French Communist Party."

Modelski said that after the collapse of France, Zlotowski came to this country to become a professor, and worked here as a scientist for four years.

Zlotowski was a prominent Communist and I have heard that he was a great scientist," Modelski went on.

Modelski said Zlotowski again went to Poland about 1948, and then the witness added:

"It was the job of Zlotowski, whose real name was either Goldberg or Goldman, to do espionage in the atomic bomb field because he was a physical scientist and specialist in this field."
