

Actor Fredric March, Wife Branded By FBI As Active In Communist Party Work

WASHINGTON, June 9. — (AP) — A secret FBI report read to the jury in Judith Coplon's espionage trial Wednesday identified "Fredric March, the actor" as a Communist Party member in 1947.

The report, read over the vigorous opposition of the government, also described March and his actress wife, Florence Eldridge, as active in numerous Communist-front activities.

The long report was read by Miss Coplon's attorney, Achibald Palmer, in his usual rapid manner. Reporters and court room spectators were able to understand only snatches of it.

The report said that "confidential informant 402" told the FBI that March was a Communist Party member in 1947.

The report mentioned many other confidential informers as providing the FBI with information on Mr. and Mrs. March as well as other persons well known in the entertainment field.

The report was captioned "Stuart Legg—Possible Russian Espionage Agent," with this added notation: "re—Frederick March, security matter C."

The report said the FBI informant was "satisfied" that March was a member of the Communist party.

He also described March as active in the "Communist infiltration of the motion picture industry."

The same informant advised that he was satisfied that Edward G. Robinson, Paul Robeson, Donald Ogden Stewart, Ruth McKInney, Alfred Maltz, Alva Bessie Dalton Trumbo, Millen Brand and Michael Blankfort had been used by the Communist Cultural Com-

German Toilers Block Effort To Dismantle Plant

DORTMUND, Germany, June 9. — (AP) — Hundreds of German workers formed a human wall Wednesday and blocked British attempts to begin dismantling a synthetic gasoline plant.

Ten German workmen had been sent to the plant to begin removing the machinery. They were accompanied by British officers. Workers who would lose their jobs if the plant is dismantled blocked their way, and they left, indicating they would return.

The plant is one of those the British have announced would be dismantled as a prohibited industry. It makes paraffin, gasoline, oil and other products by synthetic processes which have been outlawed in Germany by the four occupying powers.

The British announcement had brought protests from Germans and mass meetings were scheduled today in the Ruhr area. The state parliament of North Rhine-Westphalia adopted a resolution yesterday urging their officials to take steps to "preserve these vital industries."

As the dismantlers approached the Dortmund plant they saw a dummy hanging from the gate. It bore a sign: "They took my bread—I had no choice but death."

The Germans contend thousands will be made jobless by the dismantling program.

Paul Claassen, chairman of the Plant Workers Council, told a reporter workers of condemned factories will resist entry of dismantling crews.

Epsom Salts Seep Into City's Drinking Water

TEMPLE, Tex., June 4. — (AP) — Something new has been added to drinking water here—epsom salts.

Water Supt. N. E. Trostle confirmed the suspicions of many that something was different. He blamed an uncapped salt-water well, or possibly rainfall concentrated in an area where the soil is rich in these minerals. Epsom salts is used most frequently as a laxative.

Trostle left hurriedly for Austin. He thought the State Board of Water Engineers may be able to help.

The date at which gunpowder was first used in artillery in battle is uncertain, but is believed to be 1331.

(NEA Telephoto) **REDS ROLL ON**—Chinese Communists, again on the move, reportedly captured Tsingtao (1), last pocket of Nationalist resistance north of the Yangtze River. Meanwhile Nationalist forces are reported evacuating the rail city of Changsha (2), and Gen. Pai Chung-Hai, Nationalist commander in central China, is believed moving an army of 300,000 troops southward. He is expected to establish new headquarters at Hengyang (3).

Double Corn Yield In Garden By Weed Kill Instead Of Cultivating

Amateur gardeners of experimental bent may double the yield on a small sweet corn patch by planting twice as many plants as usual, and using 2,4D to kill the weeds, instead of cultivating.

Best for the purpose is a heavy soil, well fertilized. At least 4 pounds should be spaded into every 100 square feet, even if the soil is fertile to begin with. Sow three or four seeds to a foot in drills a foot apart, thinning out to six inches for early varieties, and one foot for tall, late kinds.

The U. S. Department of Agriculture advises that the pre-emergent spray of 2,4D may be applied at any time from the third day after sowing, until three days after the corn seedlings emerge. Use 1 1/2 to 2 pounds of 2,4D acid equivalent (the man at the store will understand) per acre. This spray will control weeds for four weeks, after which the corn plants should be tall enough to shade the ground, and keep down competition.

When to Get Best Results
Best results are obtained when

the temperature is high enough and the soil moisture sufficient to cause prompt germination of both weed and corn seed. In sandy, porous soil, or if it rains hard after spraying a heavy soil, the chemical may be carried down to the corn seed and injure it as well as the weeds.

If the corn borer is active in your vicinity, when the plants are knee high dust them with five percent D. D. T. Repeat this in 10 days, as a minimum protection. It is better to dust four times, five days apart.

Seed should be sown as soon as danger of frost is over.

Sow in Short Rows
A sowing should be made in four short rows rather than in a single long row. This insures that when the pollen is ripe, a cross wind will carry it to the silk in the young ears of an adjoining row, rather than wasting it on the ground, as might be the case in a single row. Each silk must be fertilized by pollen, in order to produce a kernel, and many failures with corn are traceable to poor pollination.

Fir Lumber Cut So Far Below Rate Last Year

PORTLAND, Ore., June 9.—Sawmills of the Douglas fir region so far this year have cut 430 million feet of lumber less than for the same period last year, said H. E. Smith, secretary, West Coast Lumbermen's Association, as he released figures for the period ending with May output.

Smith said the weekly average cut for May of 172,269,000 board feet is about the same as weekly average production during March and April. May shipments of 170,028,000 board feet were only slightly more than two million feet below May weekly production.
