**Committee Votes Senate Funds For Swivel Chairs, Refrigerators**

WASHINGTON, June 10.—(AP)—The House Appropriations Committee has refused to approve \$10,000,000 for work on a new Senate office building but said the Senators may buy new swivel chairs and refrigerators. The Committee also decided that House members can get along without 2,000 new desk lamps, but should have new carpets for their offices. Completing a \$62,200,705 bill to finance the legislative establishment for the 12 months starting July 1, the Committee refused, too, to approve a requested \$1,500 appropriation for piped-in soft music for the Library of Congress.

**British Action Cuts Down U. S. Lumber Exports**

WASHINGTON, June 10.—(AP)—Administrator Paul Hoffman says the ECA is in no way responsible for a decline in exports of U. S. lumber to Europe, chiefly to the United Kingdom. Hoffman told Rep. Hale Boggs (D-La.) in a letter that his agency "wishes to protect and promote the best interests of the lumber industry insofar as they are not inconsistent with the purposes of the ECA program."

Boggs had referred to the ECA chief a letter from P. M. Sleet, manager of the Donaldsonville, La., Chamber of Commerce. Sleet said reports to him showed that since adoption of the ECA program the United Kingdom has cut its lumber purchases from this country drastically, a move having an adverse effect on the U. S. lumber industry. In reply Hoffman said that Sleet "appears to consider that the ECA is in some way responsible for the situation in the hardwood export business."

"On the contrary, we believe that without ECA the quantity of lumber exported would be much less than it has been."

He said the reasons England cut its lumber purchases from this country sharply "lie in the economic conditions existing in Europe, and in the austerity which is an important part of the United Kingdom's recovery program."

He called attention to an April 29 declaration by ECA stating its policy with regard to purchases of lumber and plywood.

This statement said that in the future ECA "will request all participating countries desiring to purchase lumber or lumber products for dollars to afford the United States lumber industry an opportunity to compete for the business."

library have music, other government departments would want it also, and first thing you knew the government's music bill would be terrific.

Despite the cut ordered by the Committee, the bill's total is \$686,114 more than Congress voted for its own and related operations for the current fiscal year.

It is \$11,697,479 under the total recommended in President Truman's budget.

**Portland Grocer Fights Boost in License Fees**

PORTLAND, June 10.—(AP)—An East Side grocer has asked Multnomah Circuit Court for an injunction against Portland's new batch of ordinances boosting city license fees.

Philip Sunseri, an independent retailer, said the levies were grossly unjust, confiscatory and were violations of both state and federal constitutions because they were discriminatory.

He said the 21 ordinances were designed primarily to discourage a referendum move against a personal income and net profits levy. The "income" ordinances were referred to the people through petitions.
