DOWN WITH MOSQUITOES!

By CHARLES V. STANTON

County Sanitarian Claude Baker, speaking before the Lions club in Roseburg recently, disclosed that numerous mosquito-breeding areas have been inspected. He cited as sources of the insect pests, now plaguing many sections of the community, nearby mill ponds, stagnant pools along Deer creek, and various marshes and stream courses in West Roseburg and in the north part of town.

His conclusions were that a successful eradication campaign could be conducted but that it would require a considerable expenditure of money and complete cooperation from individual residents.

Baker's investigation followed a flood of continuing complaints concerning increasing swarms of mosquitoes. His findings contain little news to anyone who has interested himself in the situation.

A visit to mill ponds will show shallow water along the edges swarming with "wigglers." Deer creek, which has dropped to summer level, is perfect for mosquito-breeding purposes. To the other sources mentioned by the county sanitarian might be added a few perpetually wet spots in center parking strips on Jackson street and Commercial avenue in North Roseburg.

It would not be too difficult, nor too expensive, to start at least a partial eradication campaign immediately. We must have either voluntary or compulsory assistance from mill companies, but most important, and the most difficult to obtain, we must have 100 percent simultaneous cooperation from every household in the city.

We imagine the mill companies would be willing to treat their ponds if given directions as to proper methods. The extremity of the situation would justify an appropriation from city and county emergency funds to treat breeding areas inside and adjacent to the city.

Cleaning up principal breeding spots would be a partial friction. solution, but such a campaign would not be of any material relief unless simultaneous cooperation came from residents throughout all urban and suburban areas.

If, while ponds, streams and marshy spots were being treated, every household would follow a prescribed method for destroying mosquitoes in and around homes, and for a fixed time, we could gain relief in a few days.

ixed time, we could gain relief in a few days.

Handy DDT sprays are available for household use, tocame across this item in the atEJ reca gether with smoke bombs, spray and powder for treating tractively printed Oregon State Game Bulletin:

| Comparison of the could be provided by th

We hope the county sanitarian will not allow the project Juveniles Not Allowed to end with a report on his investigations but will endeavor To Hunt Alone to work out a detailed program for submission to county and city authorities. If an eradication campaign is finally organized, residential cooperation should be voluntarly forthcoming.

When Secretary Krug of the interior department remonstrated against placing the Columbia Valley administration proposal before voters of the Pacific Northwest he furnished conclusive proof that CVA planners have as their real ob jective federal seizure of the Basin.

In place of an election, where people would have an opportunity to express their desires in true democratic style, Krug wants a public hearing.

We've seen too many such hearings in which the federal agency involved acts as judge and jury over its own acts. CVA by a congressional committee hand-picked by an administration-dominated Congress?

CVA, under present proposals, would be controlled by a three-man board appointed by the President, each of the three-directors required to be supposed to be su

three-man board appointed by the President, each of the three directors required to be sympathetic to federal control policies.

Demands for representation by the affected states have been firmly rejected. Now Secretary Knym document and the street of the three directors required to be sympathetic to federal control the Six now in session) Rep. John McDuffie of Tennessee became interested in the hydroelectric power possibilities of the Tennes.

But new (guaranteed) cated as close to your color of the color and plants for development of that basin well under way.

But wait a minute! You've read about the color of the color

been firmly rejected. Now Secretary Krug doesn't even want the people to have a voice in the matter.

Thus we have a startling indication of what is in store for us if CVA ever becomes an actuality.

Committeemen **Elected For Farm** Conservation

The work of the elected farmer agricultural conservation program committeemen-both counly and community-has taken on a new importance in preparation for the possible establishment of acreage allotments and conducting marketing quota referen-dums. Final decisions by the secretary still await current crop prospects but the committees have to be ready.

The committeemen continue to have the big responsibility for the operation of the agricultural conservation program and now they are in the midst of getting figures together for in dividual farms as a basis for possible allotment and marketing quota operations.

If and when a county allotment is made, it will be up to the county committee to make equitable allocations to individual farmers. They must administer the crop loan part of the program and are busy helping farmers with their storage problems.

These committeemen, county and community, who have so much to do with the operation of the production and marketing administration in Douglas county are all local farmers. They are elected each year by their farmer possibles.

Certain to create quite a stir
is a suggestion from the office
of the secretary of state that the
next session of the Oregon legislature may be asked to repeal
the act allowing the refund of
gasoline taxes when the fuel is
used in vehicles not operating on
the public highways. The reason
for the threat is that the act has
been taken advantage of to defor the threat is that the act has been taken advantage of to defraud the state by persons claiming refund not only on gasoline used in vehicles operated off the highways but for those used on the public roads as well. The state collected \$23,414,000 in gasoline tax money in 1948. But of that figure, over \$3,000,000 was refunded. He a vily increasing numbers of claims for refunds bear evidence of fraud by farmers and logging operators operating their private cars on tax-free gasoline, it is stated.

It is but just that gasoline used in vehicles not operated over publications.

It is but just that gasoline used in vehicles nof operated over public roads should be free of the tax used for building and maintaining highways. The sum of nearly \$37,000 was saved last year by state department auditors who denied refund claim after finding evidence of fraud. More, it is believed, would have been saved were help available for more thorough audits of all claims. Despite the evidence of crookedness on the part of many, one assum-

er that the great majority of the refund claims are honest yet once more there is the prospect that the innocent may suffer be-cause of chiseiers who dodge paying their share toward the roads they use.—wjc. Now you Know! The answers to everyday insurance problems *

QUESTION: Recently we suffered a fire loss which was paid by our insurance company. Now a friend tells me that my insurance policy expired with the settlement and I must take out a new policy. Is this true?

ANSWER: Not entirely unless the the insurance company paid you the full amount of the policy the full amount of the policy. When an insurance company pays you for a fire less, it deducts the amount paid you from the amount of the policy. Thus, if you had a ten thousand dollar policy and the company paid you five thousand dollars, you would still have five thousand dollars in insurance. However, you should see your insurance agent about having your policy changed to give you adequate protection again.

* If you'll address your own insurance questions to this office, we'll try to give you the correct answers and there will be no charge or obligation of any kind.
