Four men donned gas masks to view the first test use here of hydrocyanic acid gas for furniture fumigation Wednesday. This potent gas is required, under a new state law, for the fumigation of all used furniture and bedding offered for sale.

The demonstration took place at the Douglas County Poultry, first firm in the county to be licensed for use of hydrocyanic acid gas under the law which became effective July 16.

Walter Bernal, manager, and Jack Butler, employe, received instructions in use of the gas from Glenn H. Howe, field in spector for the State Board of Health, and E. H. Macomber, San Francisco, representative of the American Cyanamid Co., who said the gas is safe, "if treated with respect."

For merly furniture and bedding fumigators used sulphus and formaldehyde. Used carelessly by some operators, said Howe, these chemicals did not always result in a proper fumigation job. So the last legislature passed a new law requiring use of hydrocyanic acid gas to assure complete fumigation.

The new gas is "strong enough to do the job," said Howe. It will kill insects and other pests in to do the job," said Howe. It will kill insects and other pests in to do the job," said Howe. It will kill insects and other pests in to do the job," said Howe. It will kill insects and other pests in to do the job," said Howe. It will kill insects and other pests in to do the job," said Howe. It will kill insects and other pests in to do the job," said Howe. It will kill insects and other pests in to do the job," said Howe. It will kill insect sand other pests in to do the job," said Howe. It will kill insect sand other pests in to do the job," said Howe. It will kill insect sand other pests.

In slightly different form, as cyanide gas, it is used in the death house at the state peniter. It is a deadly gas, but used with caution by men who know to handle it, it is safe," commented Macomber.

For the purposes of the test, Howe placed carpet beetles in small, round pill boxes in the fumigation chamber, a former of discrept bea

which stalled the aid bill:
Lucas raised a point of order—
a challenge—against an amendment which would have required
ECA to earmark \$1,500,000,000 for

ECA to earmark \$1,500,000,000 for buying surplus American farm commodities. The amendment was sponsored by Senator McClellan (D.Ark). Lucas's fight to kill the Mc-Clellan amendment led finally to a ruling by Vice President Bark-lev which was challenged by Sen-ator Taft (R-Ohio). The Senate ided with Taft by a vote of 51 to

And then McClellan challenged

And then McClellan challenged the entire bill with a point of order which automatically sent the measure back to the committee.

The basic issue was not European recovery—but whether the amendments violated Senate rules by writing new legislation into an appropriations pill. The constitution requires that all appropriations originate in the House Issue Left in Doubt

Barkley told reporters the people of Europe should not be alarmed by the vote—because it was purely a technical matter of senate rules. He predicted a foreign aid money bill will be passed.

The fundamental nicige of the treaty, that an attack on one signatory will mean an attack on all meansy will mean an attack on all meansy

passed.

But the action wiped out four days of Senate debite and left the issue hanging in doubt—possibly for weeks.

McKellar, McClellan and Wher-

ry all said they saw no reason for the committee to back down on the amendments opposed by the the amendments opposed by

the amendments opposed by the Senate leadership.

"I'm not going to back down," McClellan said. "I'm going to fight to keep the farm commodity amendment in the bill. And I'm in no rush. I think we should review the whole thing—and perhaps cut another \$1,000,000,000 off the European recovery program."

Wherry thought new hearings might be helpful—but Senator Saitonstall (R.Mass), a strong supporter of ECA, said he hopes there will be no delay, there will be no delay.

Rights-Of-Way Sought For Highway Project

The project will extend from the end of the present asphalt-paved section, east of Dixonville junction, to the Lone rock bridge junction, to the Lone rock bridge and every the North Umpqua river. Between the Glide bridge and Lone rock, the highway will be laid in virtually a straight line.

The only iron available to Grading, surfacing, and olines ancient man was that which be

Require Assured Market (Continued from page 1)

together there is an enormous amount of wood waste.

Although the county's timber is managed for the most part on sustained yield, with no feat it will be exhausted, there is concern here, he said, about getting more complete utilization and reducing as low as possible the percentage of the tree that remains unused.

Waste Benham National

Waste Problem National
Waste and low-grade wood are
available at comparatively low available at comparatively low cost wherever wood products are manufactured in large quantities. Douglas county is not unique in this respect. The same problem bered county in the United is faced in practically every tim-

"Perhaps the most important question for you to answer is: What can we sell profitably here that we can make here?" said

An excellent way to reduce waste, Hunt pointed out first, would be for milling and logging operators to reduce wasteful practices. It is also possible to make from waste wood hundreds of products that, from a purely technical standpoint, can be made in Douglas county as well

"But only those products should be made here that can be marketed at a profit," he cautioned.

"A stioned."

Nation's Figure In 1948

"A surprising number of people seem to feel that all they need to start up in the business of wood utilization is a recipe for some wonderful new product. As a matter of fact, this is seldom

of first importance.

"Essential requirements are business sense, alertness to technological developments, and ability to sell profitably against competition."

Disadvantages Faced Disadvantages Faced
All woods growing here can be
made into some kind of useful
pulp or paper. This area faces
the disadvantages of having to
avoid water pollution and being
a great distance from large consuming centers. Hunt said.
Conventional processes of mak-Conventional processes of mak

Conventional processes of maxing pulp and paper usually require the investment of millions
of dollars and a daily output of
a hundred tons of pulp or more,
for maximum efficiency, Fiunt
added. They also require large
volumes of water most of which
is returned to the stream carry-

is returned to the stream carry-ing varying quantities of dissolv-ed and suspended solids.

Production of fibre boards might be profitable in mills with capacity as low as 10 tons of wood waste a day—provided, of course, a profitable market is available.

Sugar Plant Should Wait
An interesting study of recent
years is that of production of sugars from wood. Molasses obtained from wood sugars can be fed to livestock as a supplemental

Senate debate on ratification of the treaty.

He said that because "our re-sources are limited" it is neces-sary to concentrate the main American effort on Europe, He termed this an effort vital to to American security.

Rent Increase

rom gangsters only a month before as he was entering his apartment.

The county grand jury, meanwhile, is expected to return indictments today following its explosive inquiry into police vice have fig. Mayor Albert G. Flegel and Councilman Jack Hart attended a session of the local rent advisory

sion of the local rent advisory board Wednesday night.

The board met to consider the request of a landlord and his wife for raising the rates on three small rental units, situated on property they own in Roseburg.

E. G. Clay, Corvallis, area rent director, said the advisory board made a personal inspection trip to view the property. They recommended the rents be continued at \$35 a month for each cabin. The landlords, whose names were not given, had asked increases to \$50.

There was no discussion on the

Stronger Fabric For "Old Glory" Research Project

WASHINGTON, July 28—(P)—
The Star Spangled Banner—long may she wave.

That's the goal of a research project undertaken by the Public Buildings administration, which buys flags for more than 1.500 buildings at a cost of about \$15,000 a year.

The average cottun—and—wool bunting flag lasts 27 days, buildings Commissioner W. E. Reynolds told reporters. The flags fade and tear more quickly in winter than in summer, and some areas are harder on flags than others. On buildings in the windy, foggy San rancisco Bay area, for example, at least one new flag must be installed every day, Reynolds said.

Flag testers will work with many different materials, with plastic lacques and chemical processes, and with various types.

Flag testers will work with many different materials, with plastic lacques and chemical processes, and with various types of stitching.

Last winter, for the first time, a nylon flag was tested. It was flown from the new Interior building for 76 days, a record for that season.

Nylon costs about twice as much as standard bunting, however.

Vice President Barkley Refutes Romance Rumor

There was no discussion on the decontrol of rents, said Clay, and the city council representatives did not state their impressions of the board's meeting.

Mayor Flegel commented this morning that he felt the board's deliberation was "well done" and that they had given "every consideration" to the problem at hand.
