North Douglas County Residents:

As newly appointed representative for **RAWLEIGH HEALTH PRODUCTS** for this district, I earnestly solicit your patronage and I will be calling on you in the near future.

HUGH C. GIVEN

324 E. 2nd Ave. N.

Roseburg

Would you buy a nightgown from a **PLUMBER?**

No, of course not. Plumbers don't have much knowledge of style, sizes or quality of sheer nightgowns. Nor would you call an electrician to repair plumbing... or a veterinary to fix your car. Why then, should a person buy his camera from someone who DOESN'T KNOW MUCH ABOUT CAMERAS? For cameras are sometimes pretty tricky gadgets—and too, when you buy a camera the seller is morally obliged to show you how it operates, how to load film, etc. You might want to learn to develop your own film! Should your camera need repair it's nice to know you can take it back and have it fixed where you bought it. The point is this: camera buyers are too often paying for something they're not getting—SERVICE. For service, to us, means showing you exactly how to operate your camera under varying conditions, how to use color film, how to take pictures with the aid of flash bulbs... and other valuable information YOU SHOULD KNOW in order to take good pictures consistently. Precision cameras purchased at the Photo Lab each carries a lifetime guarantee—a valuable item. You can bring your camera here any time and we'll clean it free. Of course we develop films (overnight service, too) and will supply you with developing equipment, camera supplies and other photographic necessities. With every purchase we offer a myriad of free services... we consider it our obligation to you. For we're in the PHOTOGRAPHY business... we know that anyone can take excellent pictures all the time. We'll be glad to show you how to do just that. Remember—FREDRICKSON'S PHOTO LAB, 105 E. Cass street.

OUT OUR WAY THE ORIGINAL Sissy By J. R. Williams

Congress Wins Right To Aid In Decisions As To Sharing Of Secrets On Atom Bombs

WASHINGTON, July 29.—(AP)—Congress members appeared Thursday to have won a major victory in the hot dispute over their right to help decide whether atomic secrets are to be shared with other nations.

Lawmakers greeted with obvious satisfaction the presidential olive branch held out at a closed door meeting of State department, military, atomic and congressional policy makers.

An appropriation of \$1,090,120,397 to carry on atomic development in this country during the year which began July 1 was approved by the Senate yesterday. Of this amount, \$702,930,769 is cash and \$387,189,628 authority to enter into contracts.

The total, which was approved previously by the House, is \$76,879,633 less than the Atomic Energy commission requested.

The Senate voted also to allow the commission to spend money remaining from its appropriation for the year ended June 30. This is reported to be in the neighborhood of \$40,000,000 to \$50,000,000.

Mr. Truman told the Senate-House atomic committee through Secretary of State Acheson that he feels any action on the share-

the-atom issue must have the support of both Congress and the executive branch of government.

A vital factor in the question of sharing the nation's A-bomb secrets with Britain and Canada is the fact that the United States is largely dependent on those countries for its supplies of uranium—the material that makes atomic weapons possible.

Senator Hickenlooper (R-Iowa), ranking GOP member of the joint committee, said he understood Acheson's plan to mean the United States would not divulge any atomic secrets on a "higher level" than at present. And this level, he told a reporter, is "far below" that involving bombs and industrial information.

He added he is satisfied now that Congress and the joint committee will not be by-passed in what he termed the "so-called negotiations."

Hickenlooper over the weekend had declared that this country must not be allowed to forfeit its lead in the atomic field by giving its know-how on weapons to any other country.

Ailing "Babs" Wins Plea For Custody Of Her Son

DEDHAM, Mass., July 29.—(AP) One of the world's richest mothers—Woolworth heiress Barbara Hutton Troubetzkoi—Thursday won her appeal to keep her only son with her for the rest of the summer.

Probate court Judge Arthur W. Davis announced an agreement that permits 13-year-old Lance, son of Babs and the former Danish Count Haugwitz Reventlow, to stay in Europe until Sept. 7.

The agreement by attorneys for Babs and the ex-nobleman, who was in court, came after affidavits were filed which declared that Babs is critically ill and in "very low morale."

Japan Revives Fishing Industry On Big Scale

TOKYO, July 29.—(AP)—Japan will produce about seven billion pounds of fish this year. That's the estimate by William C. Neville, deputy chief of headquarters' fisheries division.

The 1948 catch was approximately five and a half billion pounds.

Japan's prewar catch was eight and a half billion pounds a year, but in a wider area.

Neville said Japan has been restored to first place among fishing nations. It has 1,250,000 fishermen operating more than 450,000 boats.
