Unions Authorize Strike Against Union Pacific R. R.

SALT LAKE CITY, Aug. 30.—(AP)—Engineers and conductors unions have authorized a strike, effective Oct. 1, against the Union Pacific railroad in five western states, officials announced today.

They emphasized, however, that negotiations with management might result in postponing of the projected walkout. Announcement of the strike action was made here by H. W. Corbett of Pocatello, general chairman of the Order of Railway Conductors, and in Nampa, Idaho, by D. W. Brasse, chairman of the Nampa local of the Brotherhood of Locomotive Engineers.

In both cases the dispute involves time claims which have been rejected during the past three years, union spokesmen said. Union Pacific railroad authorities declined to comment.

The area involved extends from Huntington, Ore., on the west, through southern Idaho to Granger, Wyo., and from Salt Lake City north to Butte, Mont.

KDND DIAL-LOG

The why and how of headlines and history will be adapted into a new type day-time radio feature when Mutual-Don Lee presents the famous story-teller, Marvin Miller, in his series of dramatically narrated "Behind the Story" programs starting Monday, September 5 (4:30-4:45 p.m.). Mr. Miller is one of radio's foremost story-tellers and personalities. He is also a character actor capable of bringing to life the many types of personalities who have made headlines, who have made history. He will incorporate these abilities in his new programs, when he narrates and interpolates the behind-the-scenes facts that will make up each of his Monday through Friday-broadcasts. Typical of the kinds of stories he plans to tell are such as these: How could an airplane hover over a great city, fifty years before airplanes were invented? Why did the wife of an English nobleman become the captain of a pirate vessel? What man bought the world for a million dollars cash, and actually took title? Under what circumstances was the world's biggest diamond found?

On KRNR tonight: "Box Thirteen" at 8... "Jovin Jamboree" at 8:30... "Ruth and Judy" at 9:30... and "John Steele, Adventurer," at 10. Don Lee's "Cues in Music" is scheduled as usual in the 11 to 11:30 p.m. time-period for late dialers.

In radio—you know that summer's ended when the network program orders come rolling in for shows which have enjoyed the luxury of a summer hiatus. September will bring it such personalities as "Tom Mix," "Captain Midnight," "The Shadow" and another Sunday favorite, "True Detective Mysteries," back to the KRNR air-waves.

Anti-Freeze Kills One Jail Inmate, 2nd Barely Saved

ELLENSBURG, Wash., Aug. 30.—(AP)—One of three Ellensburg city jail prisoners who broke into a supply room in the jail tank is dead and another seriously ill from drinking anti-freeze fluid, Coroner Henry Wager said.

McCullin Bradley, 45, a transient worker from Delaware, was dead when found in the cell Monday morning by officers who attempted to waken him for breakfast. He had been arrested early Sunday on a charge of drinking in public.

Roy F. Comstock, 35, of Illinois, was near death, but was resuscitated by an Ellensburg fire department crew. Comstock had been arrested early Sunday on drunkenness charges.

A third prisoner, Hadsell Brumbaugh of Seattle, also drank some of the anti-freeze but not enough to make him seriously ill, Wager said.

The fluid was of the permanent anti-freeze type and had been stored in the supply room in the jail tank after it was drained from police vehicles last winter.

RALPH CAKE HURT

REDMOND, Aug. 30.—(AP)—Republican national committeeman Ralph Cake was recovering today at his Metolius river ranch from a knee injury suffered in an automobile mishap.

"Activated" Shell Premium is the most powerful gasoline your car can use!

"Service is my business"

YES, many of today's engines have been stepped-up... they call for more powerful gasoline! Now Shell gives you the most powerful gasoline your car can use—Shell Premium—it's "activated." No other fuel can top its power in your car!

This is made possible by Shell's own, specially produced power components and by Shell's own blending methods!

Actually, Shell splits molecules to get more power for today's more powerful engines. So you get a gasoline that's "activated" 3 ways!

1. Activated for knockless power! Pulling hard in low gear or traveling at full throttle, Shell Premium delivers full, quiet power!
2. Activated for fast "getaway." Shell Premium delivers the extra power you can feel—no "balking," no "stuttering"—you go!
3. Activated for full mileage. Shell engineers "balance" Shell Premium so that every drop of fuel goes to work for you!

Activation makes the difference

Shell splits molecules: Shell scientists take the finest available crude—activate the molecules by splitting them and rearranging the atoms according to Shell's formula for a perfectly balanced gasoline. The result—Shell Premium, the most powerful gasoline your car can use!
