

**Odell Lake Will Receive Fresh Planting Of Trout**

PORTLAND, Oct. 20.—(P)—A five-year program to stock Odell lake with lake trout was reported by the State Game commission.

The lake trout often called Mackinaw—will be hatched from eggs at the rate of 100,000 a year and when six inches long will be liberated in the lake high in the Cascades near the Willamette highway.

Mackinaw were planted in Odell lake more than 30 years ago but not enough maintained themselves to make good fishing. However, Dr. John Rayner, chief of the commission's fishery operations, said it was believed that by rearing them to five or six inches, they would thrive. The trout, he said, reach spectacular sizes and should provide excellent fishing.
