MONOTONY GETS 'EM DOWN

LONDON.—(P)—A university of Edinburgh expert on nutrition suggested today that ten years of bitter austerity may be getting the British people down. "The fatigue and lassitude so often complained of in this country," Dr. A. P. Meiklejohn wrote in "The Practitioner," a medical journal, "are much more probably the result of the common monotony and frustration of post-war life than of underfeeding."

"There is no objective reason for thinking that normal people, receiving the average diet available in Britain, are likely to suffer from malnutrition," he said. It's more likely, he added, that people are just tired of eating the same old thing.

Eskimo Maid Shuns Plane, Insists On Dog Sled Trip

FAIRBANKS, Alaska.—(P)—Mollie Whitebear wants to go to Hollywood but the 19-year-old Nome Eskimo girl is afraid to fly in one of those "motor birds."

So she has suggested that Morton Tahlor, her Brooklyn "radio Romeo," travel down the Alaska highway with her by dog sled.

Tahlor now is in Alaska to keep a date he made with Mollie by long distance telephone as one of the zany stunts on the "truth or consequences" radio show. The bachelor from Brooklyn didn't know he was hooked up with Nome when he made the date, as instructed.

"Tahlor says he knows nothing about dog teams, except that he would hate to deliver mail to a house that had a set of 'em. So Mollie has offered to do all the driving on the four-week trip. The Eskimo girl is afraid she couldn't stand Southern California's constant "big thaw" weather, but her many relatives insist living quarters might be arranged for her in a nice neighborhood's cold storage plant.

Mort pleads indecision about the whole idea. Says he: "I got to keep a cool head."

When a nail is properly driven into seasoned wood its holding power increases with time.

POST-DEATH ACTIVITY

A heart specialist, Dr. Peter J. Steincronh, says in the American Magazine that after we stop breathing our brain survives anywhere from a few seconds to 15 minutes; heart muscles last 20 minutes; eyes, 30 minutes, ears, one hour; arms and leg muscles, 1 hour; blood molecules, 18 hours; bones 3 days; skin, 5 days.

BRAINIEST ANIMALS

According to experiments conducted by a Columbia University professor, the ten top-ranking animals, in the order of their respective intelligence are: chimpanzee, orangutan, gorilla, monkey, dog, cat, raccoon, elephant, pig and horse.
