

Oregon-Idaho Truck Agreement Will Be Revived

SALEM.—(P)—Oregon and Idaho are expected to shortly resume their agreement to let each other's truck operate without interference.

Secretary of State Newberry said that his assistant, William E. Healy, would fly to Boise to sign a new reciprocity agreement for trucks.

Idaho cancelled its reciprocity agreement with Oregon 18 months ago because Idaho felt that Oregon's 1947 motor transportation law discriminated against Idaho's trucks.

But that was fixed up by the 1949 legislature to Idaho's satisfaction, so Idaho now is willing to join Oregon in breaking down the trade barriers for trucks operating between the two states, Newberry said.

Earth Created From Dust, Not Fire, Theory Of Dr. Urey, Nobel Prize-Winning Savant

By HOWARD BLAKESLEE
Associated Press Science Editor

ROCHESTER, N. Y.—(P)—A theory that the earth was created from dust instead of fire was unfolded before the National Academy of Sciences by one of the world's foremost chemists.

The author of the new theory is Dr. Harold Urey of the University of Chicago—eminent atomic scientist, Nobel prize winner and discoverer of heavy water.

Urey did something unique. He looked with a chemist's eyes at the earth beneath our feet to find there the signs and clues to its origin.

The first thing he found was the temperature which had to exist in the top crust of earth about a billion years ago to form the present chemical compounds of the ground. That temperature was nearly 2,000 degrees Fahrenheit.

But the temperature was not the creation, he reasoned. A billion years still earlier the earth was cool, just a huge aggregation of dust gathering into a ball as the sun passed through one or more vast dust clouds in space.

This primeval dust contained every kind of chemical, including a lot of radioactive dusts. The temperature of the dust ball began rising, due to the heat from this radioactivity, and the heat pressure of gravitation as the dust got denser. Thus it rose to nearly 2,000 degrees.

Former Theories Disputed
Iron and everything else was uniformly scattered through this dust ball. That would be impossible according to former theories, which required a liquid ball of fire in order for iron to concentrate in the core of the earth, where it now is.

But Chemist Urey sees an easy way for the iron to sink to earth's center while the earth was still a large, hard ball of dust. He names the chemical condition necessary, by which melting iron slips in little rivulets along silicate paths.

Urey's idea of iron sinking to the center of a solid earth also would explain a lot of mysteries. It explains, he says, the Pacific

ocean, the continents, their drifting apart, the lost continents the tropical climate of Antarctica, the great glacial periods, and the fluctuating length of the day.

It explains, for example, how water formed from the incoming dust and how originally waters probably lay literally boiling up on the whole face of the earth. As the iron sank, it displaced the lighter material at the earth's center. This material rose on one side of the earth—where Europe now stands—as the first land. On the opposite side a compensation depression formed which now is the huge basin of the Pacific ocean.

Russians Link Tito With U. S. Woman "Spy"

MOSCOW, Oct. 27.—(P)—The Soviet Literary Gazette declared Wednesday that Yugoslav Marshal Tito is often seen in Belgrade "in the company of an American spy, singer Zinka Kuntz."

The article, carrying a Belgrade dateline, said the singer was married to a Yugoslav general and had become "a dictator of fashions for wives of ministers and generals" in Belgrade.

"This woman married Yugoslav Trotskyite General Ilich in New York and thus got into Yugoslavia," the article declared.

"Expensive diamonds are given her by Tito."

(This dispatch, filed through Soviet censorship did not further identify the woman. The Literary Gazette article's bitter personal

DuPonts To Manufacture New Synthetic Fiber

WILMINGTON, Del.—(P)—E. I. Du Pont de Nemours & company has staked \$22,000,000 on a new synthetic fiber called orlon which will go into commercial production late next year, company officials disclosed.

At the same time they said nylon production is "at an all-time high and we shall be making more and more of it."

First orlon yarn will be turned out at a plant, now being built, in Camden, S. C. Investment in this plant and in research, officials said, will add up to \$22,000,000.

Although the chemical history of orlon is not unlike that of nylon, the company explained, orlon is intended chiefly for use in different fields.

Whereas nylon yarn is employed largely in the manufacture of clothing for both women and men, the new fiber will be spun into automobile tires, tents, tarpaulins, chimney filter cloths, curtains and a variety of industrial fabrics.

"Orlon's main property," a spokesman said, "is its tremendous strength resistance. Slightly heavier than nylon, it has proved in tests to be the most resistant fiber of all our synthetics."

attack on Tito was a continuation of the growing propaganda war by the Russian-led Cominform against the Yugoslav regime.

The writer, whose name was given as V. Stoyanovich, accused Tito of "depositing his stolen wealth" in Swiss banks because "sooner or later he will have to flee the wrath of the people."

In New York, a representative for a singer who was born Zinka Kunc said it was "ridiculous" that the woman who became famed as Metropolitan Opera soprano Zinka Milanov—could be an American spy.

The representative, Jack Adams, said, "She's only interested in her music and her clothes."

Adams said the Zinka Milanov, 45, now married to General Ilich, had cabined him recently that she hoped to return to this country about the end of this month and resume her singing career. The Metropolitan opera is interested in her, he said, but wishes to audition her.

TIMBER RECEIPTS UP

EUGENE, Oct. 27.—(P)—Willamette National forest timber-cut receipts increased in the third quarter, but slight decreases in volume and appraisal on timber sold during the period were reported. Ending Sept. 30, timber cut this year totaled 66,426,000 board feet with a valuation of \$747,079.

Last year's totals for the same period were 69,985,000 board feet valued at \$715,829.

BENCH OATH DATED
PORTLAND.—(P)—Gov. J. Solomon, Portland attorney, will be sworn in as United States District judge on Nov. 14.

HEADS ROADSIDE COUNCIL

PORTLAND.—(P)—Mrs. Lela J. Lambert, Oak Grove, was elected president of the Oregon Roadside council. She has been active in conservation programs of Portland area women's clubs.

A GOOD POLICY

Blown rock wool insulation adds \$888 to the value of your home—and affords you comfortable, luxurious living year round. Average installation pays for itself within two years. We install fireproof rock wool to ceilings and walls of any building economically. A local insulation firm operated by local men. Satisfied customers through S. W. Oregon. Ask for free estimates.

Builder's Insulating Co.

... also metal interlocking weatherstripping for added protection.

NEW ADDITION

To

Goettel's Dress Dept.

Yes, we now have half size dresses by Frunkin. Originals in the latest styles and fabrics. Autumn shades of wine, teal green, grey and black. Trimmed with beads and lace they come in a complete size range.

10.98 and 12.98

It will pay you to keep your eye on Goettel's Dress Dept.

GOETTEL'S

249 N. Jackson

COMING SOON!

Watch for it next week

NEWER---FRESHER

Patterson's BREAD IN

A NEW WRAPPER

In the next few days you'll see Patterson's bread in a new red, blue, yellow and white wrapper. This heavier, specially designed and tested wrapper will assure you of more freshness in every loaf of Patterson's bread.

Watch for Patterson's Grand Opening Soon

No TRICK to TREAT HALLOWEEN PARTY NEEDS

RED & WHITE FOOD STORES

Whether it's a party for the youngsters... or the "oldsters," it's no "trick to treat" when you buy your party needs at Red & White! Stop in today for YOUR Halloween party needs. You'll find a wide selection at prices that will please!

SPECIALS FOR FRIDAY and SATURDAY OCTOBER 28 and 29

Collins MINCE MEAT 1 lb. jars	19c
Terry THIN MINTS 1 lb. box	45c
National Chocolate Cherries 1 lb. box	59c
