KDND DIAL-LOG

They're sending her a big bouquet of fresh-cut flowers, because her's was the first name chosen during the Monday night of "Phone Fun" (2:30 p. m.).

Tomorrow is another "Treasure Chest" broadcast day (1:45-2 p. m.), with fifteen minutes of carefully gathered information about glassware, china and silver—plus a bit of music—plus the added attraction of another big money-saving special at Lawson's.

The impending effect of the United States international policies and economics with respect to China and Russia, as well as the European situation, will be discussed on KRNR Thursday, November 10 (11-11:30 p. m.) by Senator Kenneth S. Wherry (Neb.), minority leader of the 81st Congress.

Housing Boom May End Federal Rent Controls

WASHINGTON, (AP)—Federal rent controls may end next summer as a result of booming home construction.

With new dwelling units going up at a million-a-year clip, some key lawmakers raised doubts that another rent control bill could be rammed through Congress when the present law expires June 30.

It is not yet clear whether the Truman administration will ask Congress to keep the rental lid clamped down when the expiration deadline nears.

In any case, a top administration leader in Congress expressed doubt that Congress would agree to another overall extension of rent limits.

Rep. Wolcott of Michigan, ranking member of the House Banking committee and House leader of anti-control forces, said he does not believe there will be any need of rent ceilings next June.

"The house industry built over 1,000,000 homes in 1948," he said "it built 840,000 in 1947. And now it is well on its way to building over 1,000,000 this year."

"This should obviate any necessity for continuing rent controls beyond June 30."

Twins Named At Birth Pose Puzzle For Parents

PORTLAND, (AP)—Ten-month-old Carolee and Merrilee Phipps may soon be renamed and again foot-printed — so their parents can tell them apart.

The plight of Mr. and Mrs. Phipps was revealed here. They admitted playing a game of "this or that one?" It's been like that since they were born last Dec. 19.

The girls were named at birth. But which one is Merrilee? Which one is Carolee? This one or that one? It's been like that now for months at the Phipps home.

They finally called in a city police fingerprint expert. Officer Joseph Morgan said it was simple. The hospital has footprint records. He volunteered to check them with new prints he made of the girls. But he found the hospital records were smudged.

"No ridge characteristics, no identification," said Morgan. But he had another idea. Footprint the twins again—and rename them, Merrilee and Carolee. "Which one do you want to call—ah, ah—this one or that one?" asked Morgan.

Navy's Sea Force Below Size Of Mothball Fleet

WASHINGTON, (AP)—The Navy's active sea force, growing smaller by the month, is now less than half the size of its mothball fleet.

Figures supplied by the Navy show that to date 395 major combat vessels had been pulled out of the Atlantic fleet and 332 out of the Pacific fleet, for a total of 727 ships in reserve.

Last July 1 there were 271 major fighting ships in active service, 174 with the Atlantic fleet and 97 in the Pacific.

By next July 1 that total will be down to 237—including three new submarines and a light carrier—as 17 ships of the Atlantic fleet and seven from the Pacific are put in storage.

That will place the total strength of the mothball fleet at 751 ships.

The admirals say that they could do a pretty fast job of getting reserve ships back into fighting trim if they had to.

The new chief of naval operations, Adm. Forrest P. Sherman, told a reporter over the weekend that he wants the biggest possible Navy afloat. He also said he will try to protect Naval aviation from proposed cuts in appropriations.

Recall Movement Against Portland Mayor Fizzles

PORTLAND, (AP)—Sponsors of a recall movement against Mayor Dorothy Lee admitted their proposal faces defeat unless more "vigorous support" is pledged.

Maxwell Donnelly, attorney for the recall committee, said the fate of the movement would likely be determined at a public rally planned for Wednesday night.

He said petitions were not being signed at a rate fast enough to meet the deadline prescribed by law. He added the committee's treasury had \$33. Signatures of 26,095 are needed by Dec. 12 to have the issue placed on a special election ballot.

Donnelly said only 1,734 of 2,186 signatures have proved valid when checked by the city auditor's office.

Sheep Raising's Soaring Costs Told By Rancher

PORTLAND, (AP)—The head of a 34,000-acre sheep ranch told the Oregon Wool Growers association here just how much his expenses had gone up in the last three years.

W. H. Steiwer, Fossil, told the 150 delegates that his gross income from sheep raising had risen 30 percent since 1946.

"Then I started on the other side of the ledger," he said. He reported that while labor was up only two and one-half percent, supplies had risen 67 percent, repair bills 58 1-2 percent, taxes 80 percent, and freight bills 44 percent.

Victor W. Johnson, Pendleton, told the convention that Oregon took in about \$12,000,000 in sheep income last year.

Pupils' Parents To Go Through Class Schedule

To learn what their children do in school, parents of Junior high school pupils will go through a normal day's classroom schedule in 10-minute periods, as an observance of American Education week tonight.

The parents will meet at the Junior high at 7:30 for registration. The procedure will be explained in an assembly in the auditorium from 7:45 to 8. Then they will go through a complete day's schedule of their children from 8 to 9:30.

R. R. Brand, principal, said this program would be followed with light refreshments. All parents are invited.

Smooth golf balls do not drive as far as dimpled or mesh surface balls. The explanation is that the rough surface enables spin to lift the ball more.

RULES FOR CHIROPODIST

SALEM, Nov. 8. (AP)—Attorney General George Neuner ruled today that a 1949 law gives chiropractors, or foot doctors, the right to treat injuries and deformities of the hands or feet.

Research Grants For Cancer Made

WASHINGTON, (AP)—A war-born technique for the quick processing of radar photographs may simplify the detection of cancer of the stomach.

Impressed with the possibilities, the Public Health service has approved a \$49,626 grant to Johns Hopkins university, Baltimore, to further work in this field by Dr. Russell H. Morgan.

The grant was among 22 totaling \$437,203, made for cancer research.

During World War II the army worked out a method for almost instantaneous development of radar photographs in combat operations.

The health service also awarded \$17,064 to the University of California for an x-ray check on possible lung cancer among 3,000,000 persons in the San Diego and Los Angeles areas.

The agency said the survey is likely to discover more than 1,000 cases requiring further examination.

These other grants were made to continue research already underway: University of Oregon medical school, Dr. Warren C. Hunter, \$16,513; University of Washington school of medicine, Seattle, Dr. Stuart W. Lippincott, \$48,600.00.
