### Guam Lashed By Terrific Typhoon

TOKYO, Nov. 18.—(P)—The air Force weather bureau reported winds approaching 145 miles an hour battered the island of Guam Thursday.

The weather observers said they managed to get a "freak call" through to the island after regular communications went out. They said the connection did not last long enough to get damage reports.

Earlier reports from the island, where hundreds of American servicemen and civilian workers are stationed, said several buildings had been blown down. Winds at that time had not exceeded 90 miles an hour.

The typhoon, one of the worst in years in the Pacific, was centered 45 miles south of Guam and moving west northwest at about 17 miles an hour.

Weather observers here predicted the typhoon would be 300 miles northwest of Guam tomorrow afternoon. The storm covers a 360-mile radius.

(Last direct communication between the Associated Press bureau in San Francisco and its Guam correspondent said civil

### Truck-Auto Collision Fatal To One Driver

PENDLETON, Ore., Nov. 18.—(P)—Fred McCure, 23, was killed last night in a truck-auto collision at the Reith junction west of here. The victim was an operator at the Pendleton airport control tower.

Oregon state patrol officers said the truck was driven by William Harrison Turner, a driver for the Olympia Milk Co. of Olympia. He was reported "scratched and bruised."

Cause of the accident was not known.

Authorities on Guam had checked homes and business houses for safety measures before the storm struck.

(Thousands of Guamanians in villages moved to designated storm shelters. Many sought refuge in caves used by the Japanese to fight invading American forces during the war.)

### ORIGIN OF RADIO TUBE

NEW YORK —(P)—The radio vacuum tube in its present-day guise is the result of the work of many scientists. But in its early history three names stand out. They are Thomas A. Edison, who in 1883 discovered the basic principle of the tube; John Am-
