ing the reception, the couple left for San Francisco on their honeymoon and upon their return will make their home on the Garden Valley road, where they have purchased property.

FORMER ROSEBURG RESIDENT HAS FINE ART EXHIBIT IN PORTLAND
Of interest to friends in Roseburg was the announcement in the Portland Oregonian last week that Amanda Snyder, Portland artist, and a former resident of this city, is enjoying her first one-man show of paintings and clown dolls at the Khoarouba gallery in Portland. The showing, which will continue for another two weeks, includes landscapes, still life, portraits and circus scenes and displays a versatility of her work. All show unusual use of color.

Mrs. Snyder, who is a former Roseburg resident, is a sister of Mrs. Kenneth Padelford of this city; Jeff Tester of New York, famous painter and cartoonist, and Redford Tester of Portland. Mrs. Padelford left this week for Portland to attend the exhibit and visit her sister.

In addition to her paintings, which are sought by collectors, Mrs. Snyder, eight years ago, branched into her other line of art—"making clown dolls. No ordinary rag dolls, the Manda Clowns, as she has named them, are so different that a patent on their construction has been applied for. Of felt and India cotton, the clowns have puppet-like joints which permit very human movement.

"The clowns, all alike, were evolved from Raggedy Ann and Raggedy Andy dolls, which Mrs. Snyder started making in 1941. But even those were very different from the regular commercial patterns, because she 'just couldn't stand to do things the way other people do.'"

Mrs. Snyder's painting, which is done in her basement, shows use of pallet, rags and fingers, but rarely brushes. Particularly evident in her paintings is the circus theme, which provides, not only a variety of interests but color.

"Louis Bunce, member of the Portland Art museum faculty, is handling the show of paintings and clowns at the gallery. With his help Mrs. Snyder hopes to sell the clowns in New York and Hollywood and eventually on a nationwide basis. When this becomes a reality, the making of the clowns will be turned over to a factory. The clowns, which require eight hours apiece, but 'this is just 'play' to offset the long hours that go into the painting of such magnificent oils as are being shown at the exhibit.'"
